Re: ER 05-1588-079-F  
NRC: Susquehanna Steam Electric Station, Units 1 & 2,  
License Renewal Application Review  
Draft Generic Environmental Impact Statement, Supplement 35

Dear Ms. Lund:

The Bureau for Historic Preservation (the State Historic Preservation Office) has reviewed the above named project in accordance with Section 106 of the National Historic Preservation Act of 1966, as amended in 1980 and 1992, and the regulations (36 CFR Part 800) of the Advisory Council on Historic Preservation as revised in 1999 and 2004. These regulations require consideration of the project's potential effect upon both historic and archaeological resources.

We are in receipt of the above listed report and concur with the status of identification of archaeological and historic resources completed previously for this facility. We concur with your assessment that current procedures for the facility do not address the potential for site-disturbing activities for unknown or potential resources. Please have this oversight addressed in the final document.

If you need further information regarding archaeological survey please contact Steven McDougal at (717) 772-0923. If you need further information concerning historic structures please consult Susan Zacher at (717) 783-9920.

Sincerely,

Douglas C. McLearn, Chief  
Division of Archaeology &  
Protection
