START: 4/11/2007

**DESCRIPTION** 

DEPTH, TYPE, ORIENTATION, ROUGHNESS, PLANARITY, INFILLING MATERIAL AND

THICKNESS, SURFACE STAINING, AND TIGHTNESS

70.7, 70.85, 71.4, 71.6, 72.0' - Fractures (5),

73.9, 74.0' - Fractures (2), horizontal, rough, undulating, tight, join a vertical rough

74.4, 74.6' - Fractures (2), horizontal, rough,

undulating, two horizontal fractures bound a

75.5-75.6' - Fracture zone, subangular 3/4" to

75.6' - Fracture, termination of fracture zone

76.2' - Fracture, 70 deg, rough, undulating,

76.4' - Fracture, rough, undulating, 10 deg and 45 deg fractures terminate above 70 deg fracture, and 76 deg before fracture, appears

weathered with cavities 76.6' - Fracture, 70 deg, rough, undulating,

77.1, 77.2' - Fractures (2), horizontal, rough, undulating, open, friable, voids decrease with

77.8' - Fracture, horizontal, rough, stepped

78.4' - Fracture, horizontal, rough, undulating,

77.8-77.9' - Fracture zone, rock crush

78.5' - Fracture, 15 deg, rough, planar

81.8-81.95' - Fracture, vertical, rough, undulating, bonded by horizontal to 10 deg

82.6' - Fracture, 70 deg, rough, undulating,

to a 10 deg rough stepped fracture at 83.0'

83.4' - Fracture, 60 deg, rough, undulating,

84.2' - Fracture, 80 deg, rough, undulating,

undulating, leading into fracture zone with

85.5' - Fracture, 30 deg, smooth, planar 86.2' - Fracture, horizontal, rough, stepped,

fracture terminates underlying vertical

82.8-83.0' - Fracture zone, rock crush leading

leading to underlying fracture zone

84.7' - Fracture, 70-90 deg, rough,

81.1' - Fracture, horizontal, with

rough, undulating fracture

with fragmentation, friable

with fragmentation, friable

missing side of core, fracture terminated

0-10 deg, rough, undulating, tight to open

with some fragmenting at fractures

72.35' - Fracture, horizontal, rough,

72.95' - Mechanical break

undulating fracture at 73.95'

vertical fracture at 74.5'

at a stepped 30 deg face

above horizontal fracture

1" fragments

0.4' long cleave

#### **ROCK CORE LOG**

PROJECT : Progress Energy Florida - COLA Investigation, Levy County Site LOCATION : 1723362.2 N, 457763.1 E (NAD83)

START: 6/14/2007

**DESCRIPTION** 

DEPTH, TYPE, ORIENTATION, ROUGHNESS, PLANARITY, INFILLING MATERIAL AND

THICKNESS, SURFACE STAINING, AND TIGHTNESS

73.2, 73.5, 74.0' - Fractures (3), rough,

undulating, between two horizontal fractures

75.0-76.1' - multiple Fractures to fragments,

many vertical fractures with 3-4" fragments,

banded at top by 40 deg rough, undulating fracture, at bottom by 20 deg rough

undulating fracture
76.9-77.0' - Fractures or mechanical break

77.15' - Fracture, smooth, planar, horizontal

78.4' - Fracture, 20 deg, rough, undulating, at

80.6' - Fracture, 20 deg, rough, some crumble, open, gray infill at cavity included in

Fractures (7), open to tight, mostly horizontal

83.9-84.5' - softer, bounded by fractures, infill

85.3' - Fracture, 45 deg, rough, undulating,

87.1' - Fracture, open, horizontal fracture to

87.5' - Fracture, 45 deg, roughly stepped, also a discontinuity, overlying and underlying rock are different, though fracture mostly in

87.8' - Fracture, open, horizontal, roughly stepped, several small 1/2" fragments 88.6' - similar to fracture at 87.8', but in

different material with additional voids and

89.9, 90.0' - Mechanical break (2), 0-20 deg

90.9' - Fracture, 50 deg, rough, undulating, at

small fragments with two 1" fragments

healed or mechanical break

82.1, 82.8, 83.3, 83.9, 84.3, 86.1, 86.6' -

fractures, substantial voids, gray infill at

fracture, possible drilling mud, possibly

zone of increased voids and cavities from

74.4' - Fracture, 75 deg, rough, undulating

73.3' - Fractures (2), 50 deg, rough,

DISCONTINUITIES

#### ROCK CORE LOG

PROJECT: Progress Energy Florida - COLA Investigation, Levy County Site LOCATION: 1722723.7 N, 457915.1 E (NAD83)

ELEVATION: 42.9 ft (NAVD88) DRILLING CONTRACTOR: Universal Engineering Sciences, Orlando, FL; Driller: D. Patten

CORING METHOD AND EQUIPMENT : CME 550X S/N 340253, mud rotary, HQ/NQ tools, HW casing START: 2/7/2007

DESCRIPTION

DEPTH, TYPE, ORIENTATION, ROUGHNESS, PLANARITY, INFILLING MATERIAL AND

THICKNESS, SURFACE STAINING, AND TIGHTNESS

131.0' - Fracture, 60 deg, rough, undulating,

131.65' - Fracture, 40 deg, rough, undulating,

132.3' - Fracture, <5 deg, rough, undulating, open, fractured from 132.3-132.7'

134.1' - Fracture. <5 deg. rough, undulating.

136.15' - Fracture, <5 deg, rough, undulating, top of fractured zone 136.15-136.8',

mechanical breaks to 1-1/2" fragments

137.05' - Fracture, vertical, slickensided,

137.3' - Fracture, <5 deg, rough, undulating,

139.25' - Bedding plane, horizontal, rough, planar, open 1/8", top of fractured zone of

140.3' - Fracture, <5 deg, rough, undulating

144.4' - Fracture, 10 deg, rough, undulating,

144.6, 144.9' - Fracture (2), <5 deg, rough,

145.6' - Fracture, <5 deg, grayish brown

(5YR 3/2) stain, tight, 1/8" 145.75-146.2' - Fracture zone, limestone

146.4' - Bedding plane, horizontal, smooth, undulating, organic infill, tight 146.65, 146.8' - Mechanical break (2) 147.1, 147.35' - Fracture (2), horizontal,

146.2' - Mechanical break, tight

smooth, planar, open 1/2'

145.2, 145.4' - Fracture (2), horizontal, rough,

more friable material, 139.25-139.9'

139.25, 139.9' - Mechanical break (2) 140.1' - Fracture, 50 deg, smooth, undulating

136.8' - Mechanical break, horizontal

135.0' - Fracture, horizontal, rough,

135.0-135.4' - Mechanical break

136.9' - Mechanical break

mechanical breaks

#### **ROCK CORE LOG**

PROJECT: Progress Energy Florida - COLA Investigation, Levy County Site LOCATION: 1705495.9 N, 457735.8 E (NAD83)

START: 6/27/2007

**DESCRIPTION** 

DEPTH, TYPE, ORIENTATION, ROUGHNESS, PLANARITY, INFILLING MATERIAL AND

THICKNESS, SURFACE STAINING, AND TIGHTNESS

76.95, 79.85, 80.55' - Fracture (3), 25 deg and 45 deg, rough, planar to undulating, tight

77.4' - Fracture, 30 deg, rough, undulating,

77.75' - Fracture, horizontal, rough, planar,

78.3' - Fracture, horizontal, rough, planar to

81.9' - Fracture, horizontal, rough, planar

with a 1" fragment wedge between 2

82.35' - Fracture (2), 30 deg, rough, planar,

83.95' - Fracture, 50 deg, rough, stepped,

84.85' - Fracture, 60 deg, rough, undulating,

85.0-85.15' - Fracture zone, small 1/4 and

85.15, 85.4, 85.75' - Fracture (3), 10 deg,

85.5' - Fracture, 80 deg, rough, undulating to stepped, from 85.15 to 85.75

85.85' - Fracture, 70 deg, rough, undulating,

from 85.75 to 86.0 continuation of overlying

86.2' - Fracture, 75 deg, rough, undulating,

fragmentation and debris, nearly fracture

87.0, 87.2' - Fracture (2), 10 deg, rough,

87.65' - Fracture, 10 deg and 30 deg, rough,

undulating to stepped, tight to healed 88.75' - Fracture, 75 deg, rough, stepped, tight, bounded by fractures at 88.15 and

89.15' - Fracture, 20 deg, rough, stepped,

very open fracture with significant

88.45' - Fracture, horizontal, rough,

very open with fragmentation

89.5-89.8' - Fracture zone

planar, open, rounded

undulating, open

89 15'

86.55' - Fractures, horizontal, rough, stepped,
