Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNIT 2 - DISCREPANCIES IN SUPPORT DETAILS -
WBRD-50-391/82-24 AND WBRD-50-391/83-20 - SIXTH INTERIM REPORT FOR UNIT 2

In accordance with the requirements of 10 CFR 50.55(e) NCR WBN SWP 8204 (WBRD-50-390/82-27, WBRD-50-391/82-24) was initially reported to NRC-OIE Inspector R. V. Crlenjak on March 2, 1982. Interim reports were submitted on March 31, and September 22, 1982, and January 13, and April 13, 1983.

NCR WBN SWP 8315 (WBRD-50-390/83-22, WBRD-50-391/83-20) was initially reported to NRC-OIE Inspector R. Butcher on March 11, 1983. This deficiency was determined to be part of the overall Watts Bar alternate analysis programmatic deficiency and therefore was addressed in the April 27, 1983 submittal on that deficiency.

NRC-OIE Inspector L. Watson was notified on July 27, 1983 that because of their similarity and for reporting purposes the subject nonconformances were being combined. Our final report for unit 1 and fifth interim report for unit 2 was submitted on September 30, 1983.

Due to the extensive amount of work required by TVA designers to meet unit 1 schedules, unit 2 work is being rescheduled. TVA will provide the next report for unit 2 on this matter by November 1, 1985, after unit 2 design work is completed.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
