Limited Appearance
Bellefonte Nuclear Plants Units 3 and 4
Docket No. 52-014--COL and 52-15-COL

Dear Chairman Bollwerk,

I am writing to express my opposition to TVA's proposal to build two nuclear reactors at its Bellefonte site near Scottsboro, Alabama.

I was appalled when I learned that water drawn from the Tennessee River would be used to cool the reactors, with a net water loss of 66%—8.6 billion gallons per year—due to evaporation. What is more, the nuclear plants would return 91° water to the river, a temperature devastating to most aquatic life.

Equally disturbing, the Bellefonte location is an active seismic zone, a prescription for disaster!

Other issues that concern me include the potential for radioactive air pollution; that there is no long-term off-site storage available for the high-level nuclear waste the plant will generate; and the cost inefficiency of TVA's plan.

To grant a license for the Bellefonte project would endanger the citizens of Tennessee and Alabama and impose severe quality of life hazards.

Please refuse TVA a license for the Bellefonte nuclear plants.

Respectfully,

Sue Ann Lytle
