SUBJECT: VIRGIL C. SUMMER NUCLEAR STATION - NRC PHYSICAL SECURITY  
INSPECTION REPORT 05000395/2008401

Dear Mr. Archie:

On July 17, 2008, the U.S. Nuclear Regulatory Commission (NRC) completed an inspection at your V. C. Summer Nuclear Station. The enclosed inspection report documents the inspection results, which were discussed on July 17, 2008, with Mr. G. Lippard and other members of your staff. A re-exit was conducted on August 7, 2008, with G. Douglass and other members of your staff.

The inspection examined activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

Based on the results of this inspection, no findings of significance were identified. However, one licensee-identified violation which was determined to be of very low safety significance is listed in this report. The NRC is treating this violation as a non-cited violation (NCV) consistent with Section VI.A.1 of the NRC Enforcement Policy because of the very low safety significance of the violation and because it is entered into your corrective action program. If you contest this non-cited violation, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN.: Document Control Desk, Washington DC 20555-0001; with copies to the Regional Administrator, Region II; the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC Resident Inspector at the V. C. Summer Nuclear Station.
