Re. Control No. 317239, License No. 21-20313-01, Thoracic & Cardiovascular Institute.

An amendment application had been submitted to authorize the injection of radiopharmaceuticals within Ingham Regional Medical Center. We wish to abandon that application at this time. A recent change in the radiopharmaceutical used for cardiac procedures makes this request less useful. Plus, the requirement to survey each patient room after administration adds sufficient difficulties as to negate the advantage of the original request. Therefore, the amendment request is retracted.

Please contact me if you have any questions. Thank you.
