RE: Source Material License SUA-1548, Docket No. 40-8964
Annual Gas Hills Report and Surety update

Dear Mr. Mandeville:

Please find attached Power Resources, Inc dba Cameco Resources' annual Gas Hills Report and Surety update.

If you have any questions concerning this submittal please contact me at (307) 358-6541 ext. 46.

Regards,

John McCarthy
Manager, Environment, Health and Safety, RSO
Cameco Resources

**2007 to 2008 ANNUAL REPORT
for
GAS HILLS I.S.L. PROJECT
IN SITU PERMIT TO MINE No. 687**

**RE: 2007 – 2008 Annual Report for Gas Hills I.S.L. Project,
In Situ Permit to Mine No. 687**

We are enclosing two (2) paper copies of the annual report for the Gas Hills I.S.L. Project In Situ Permit to Mine No. 687 regarding the borings drilled and reclaimed over the past year under this permit and plans for the coming year. The enclosed CDs (2) each contain a .pdf file of this report and a spreadsheet file of the 2006 groundwater data. We have sent a paper copy of this report directly to Mr. Jon Kaminsky at the BLM Lander Field Office.

A total of 210 boreholes were drilled and abandoned under Permit No. 687 over the past year. These delineation holes were abandoned according to Chapter 8 and were backfilled with subsoil and topsoil. To date, 124 of the drill sites have been re-graded and seeded; the remaining drill sites will be seeded this fall.

We will be submitting a Plan of Operations to the BLM describing all planned exploration and mining activities for the Gas Hills project. Until this Plan is approved by the BLM, the BLM will not authorize any further exploratory drilling on federal surface. Once this Plan of Operations has been approved, we expect to move forward with additional Gas Hills exploratory drilling. We will notify WDEQ in advance of such drilling plans.

This annual report also includes information requested in your March 5, 2008 letter to Power Resources regarding site groundwater sampling data and monitor wells. As required in that letter, we are providing (1) October 2006 groundwater data in enclosed Appendix C and the corresponding spreadsheet (electronic file) on the enclosed CD, (2) a current site monitor well inventory and location map (Table 4 and Plate D6-1), and (3) a description of monitor well upgrade activities in progress (report Section 9.3).

1.0 INTRODUCTION

This submittal has been prepared in accordance with the Annual Report information requirement of W.S. 35-11-411(a) and addresses all applicable requests for information contained in the Annual Report form received from the Wyoming Department of Environmental Quality, Land Quality Division.

1.1 Name and Address of Permittee:

Power Resources, Inc., doing business as (d.b.a.) Cameco Resources
400 East First Street, Suite 308
Casper, Wyoming 82601
Tel. 307-237-2128

Appendix A includes the "Annual Report Attachment" listing the current company contacts and officers.

1.2 Mining Permit Number:

Wyoming In Situ Permit to Mine No. 687

1.3 Date of Permit Issuance

The permit was issued to Power Resources, Inc. (now d.b.a Cameco Resources) on August 7, 2001.

1.4 Minerals Mined

This permit was issued for the in situ mining of uranium. No uranium was mined during the report period, as the operation has not yet commenced.

1.5 State Leases and Federal Claims

State Lease Numbers

State lease Number 0-15211 is located:
SW⁴SW⁴ of Section 27; N²SE⁴, and SE⁴SE⁴ of Section 28; Township 33 North, Range 89 West.

Federal Claims

Federal claims within the permit area are shown on Plate A-2 (Volume 1, Appendix A) of the approved permit application.

2.0 TIME PERIOD COVERED BY THE REPORT

This annual report covers the period August 2007 through August 2008.

3.0 MINING ACTIVITIES

Proposed uranium mining operations have been in standby status since permit approval in 2001. Consequently, mining facilities at the Gas Hills ISL Project remain non-operational.

4.0 RECLAMATION ACTIVITIES

To date, the surface at 124 of the abandoned drill holes has been backfilled, plugged, re-graded, and seeded. The remaining completed drill holes have been backfilled and plugged, but re-grading and re-seeding of these locations is not planned until this autumn. Table 1 is the "Abandoned Drill Site Report" report on WDEQ's form. Map 1 shows the locations of the drill holes.

Disturbances caused by the boreholes included excavation of temporary mud pits (approximately 3 to 4 feet wide x 6 to 8 feet long x 8 to 10 feet deep) adjacent to the boreholes for mud rotary drilling operations. The topsoil and subsoil from these pits was excavated, segregated, and temporarily stored at the surface adjacent to the drill hole for replacement following drilling. Vehicles (drill rig, water truck, support vehicles) were driven from existing roads over roadless ground to access these borehole locations. No new roads were constructed to access these locations. Drilling materials (drilling mud/bentonite, cement, drilling pipe) were temporarily staged on the surface near the borehole locations. The area of surface disturbance for each borehole location is estimated at 800 square feet.

Once borehole drilling was completed, boreholes were abandoned using Plug Gel or an equivalent material downhole with a concrete seal near the surface, in accordance with W.S. 35-11-404 and WDEQ Land Quality Div. Chapter 8 and the mixing and plugging procedures detailed in the Operations Plan Section 3.7.3. The mud pits were allowed to dry out, then backfilled with subsoil that was allowed to settle before replacing the topsoil. The disturbed surface was re-graded to approximately original condition, and the re-graded area was drill seeded with the seed mixture specified in the Permit to Mine Application (see permit application Reclamation Plan: Table RP 5-1). Table 2 summarizes the boreholes drilled during the reporting period and their reclamation status, including estimates of area disturbed and reclaimed, seeding dates and methods, and vegetation growth progress. Site Photographs 1 through 3 show new growth. Reclamation costs incurred for the reporting period are summarized on Table 3.

5.0 MINING PLANS

No mining activity is planned for the next report period. However, if regulatory approval is received for the BLM Plan of Operations, WDEQ Mine Permit update, and NRC permit revisions, the following activities are tentatively planned for 2009:

- Install monitor well ring and the interior monitor wells;
- Conduct Mine Unit 1 Aquifer Pumping Tests;
- Upgrade Carol Shop infrastructure (restore power, water, heat, office space);
- Upgrade AML Road, and
- Exploration Drilling.

6.0 RECLAMATION PLANS

Reclamation (final grading and seeding) of boreholes drilled during spring and summer 2008 is planned for autumn 2008 when weather conditions will be optimal for seed germination. Any borehole locations reclaimed in May/June 2008 where new growth has not been established will be seeded again in autumn 2008.

Certain sloped drill sites and ephemeral drainage crossings need additional work to control erosion. These locations were graded and seeded in May/June, but recent field inspection indicated this has not been sufficient at some sites to stop erosion that is occurring during summer high-intensity thunder shower events. Cameco plans to implement temporary erosion control measures (including silt fences and geotextile fabric) at selected sites to stabilize them until more permanent seeding /revegetation can be done this autumn.

7.0 MONITORING ACTIVITIES

Monitoring activities conducted during the report period included site visits to inspect the environmental and operational performance of on-going delineation drilling. Cameco's consultants conducted field work to map soils and vegetation and to survey wildlife.

8.0 RECLAMATION SURETY ESTIMATE

The present surety bond has been increased to \$4,054,800 (Appendix B) due to drilling reclamation, estimate line item adjustments by reference to WDEQ Guideline 12 (2007 version), and general cost increases. This represents an increase of \$986,000 from the May 2008 estimate of \$3,068,800.

9.0 ADDITIONAL INFORMATION

9.1 Notices of Violation

At the invitation of Cameco, Mr. Mark Moxley of the WDEQ-LQD Lander office and Mr. Jon Kaminsky of the BLM Lander office together visited the Gas Hills site on May 6, 2008 to inspect the on-going drilling operations. During this inspection, Mr. Moxley stated that he would likely be issuing an NOV for the several boreholes he observed that had not been at least temporarily covered and/or plugged to exclude surface water runoff and accidental access as soon as the drill rig moved off of the location. Cameco has been in communication with WDEQ regarding these deficiencies and appropriate corrective action, and to date has not received a written NOV.

In response to the inspection, Cameco and their drilling contractors commenced temporarily covering boreholes using plywood sheets until the mud pits were dried out and backfilled and concrete could be poured into the borehole for the permanent plug. Once they were manufactured and delivered (July 11, 2008), drilling contractors began using pre-cast concrete plugs for both temporary and permanent borehole plugging (see Site Photo #4). Cameco and their contractors have also commenced fencing all open mud pits until they can be completely backfilled.

9.2 Permit Stipulations

There are nine Conditions¹ under Permit No. 687 that must be addressed prior to commencing mining operations. During the past year, work has been done on the following Conditions:

- A **Supplemental Vegetation Assessment report** (Condition 4) was submitted to WDEQ in January 2008 (prepared by BKS Environmental Associates, Inc.);
- In October 2006, a set of site **groundwater samples** was collected and tested for WDEQ Guideline 8 parameters to characterize current regional background / baseline groundwater quality (Condition 5). The groundwater analytical laboratory reports were submitted previously in hard copy² but not electronically. Appendix C Tables C1 and C2 summarize the 2006 groundwater results. As requested by WDEQ in their March 5, 2008 letter³, a CD containing the corresponding electronic spreadsheet file is enclosed with this report.
- A **Supplemental Soil report** (Condition 6) was submitted to WDEQ in March 2008 (prepared by BKS Environmental Associates, Inc.);
- An updated **Wildlife Survey** (Condition 8) was submitted to WDEQ in September 2007, and the revised **Wildlife Monitoring Plan** (Condition 8) was submitted to WDEQ in March 2008 (both prepared by Shell Valley Consulting Associates).

Although no new work was completed on the remaining Conditions during this reporting period, Cameco understands their current status to be as follows:

- Condition 1: Nuclear Regulatory Commission (NRC) license - approved 1/29/04.
- Condition 2: WDEQ, BLM, and NRC approval of additional reclamation bonding prior to commencing mining operations. Bond is reviewed and revised annually.
- Condition 3: Prior to commencing operations, submit Class III Cultural Materials [archaeological] Surveys for incorporation into permit Appendix D-3. Cameco submitted additional information to WDEQ 3/26/07 and 4/17/07.
- Condition 7: AML Road must be permitted and bonded through WDEQ-LQD and BLM. Application paperwork was submitted to WDEQ in March 2007.
- Condition 9: After operations have commenced, evaporation pond water must be sampled annually and tested for Guideline 8 parameters. As mining operations have not yet commenced and no evaporation ponds exist, Condition 9 is not yet applicable.

9.3 Project Monitor Wells: Inventory, Upgrade, & Abandonment

As required in the March 5 letter from WDEQ, Cameco and their consultants have undertaken a comprehensive inventory of the monitor wells at the Gas Hills project. Lidstone & Associates, Inc. searched available Power Resources/Cameco and predecessor mining company records and WSEO well permit records to compile and verify a current list and status of the monitor wells (see Table 4 and enclosed Plate D6-1). Lidstone field-checked the wells in June 2008 as part of the well upgrade

¹ R.Chancellor & D. Hemmer/WDEQ. August 7, 2001. Letter to W. Kearney/Power Resources, Inc. RE: Approval of In Situ Permit to Mine No. 687, TFN 3 5/93

² Lidstone & Associates, Inc. (Ft. Collins, CO). March 2007. *Power Resources, Inc., Gas Hills Permit Well Sampling, Fall 2006, WDEQ/LQD Permit 687.*

³ M. Moxley/WDEQ. March 5, 2008. Letter to J. McCarthy/Power Resources, Inc. RE: Permit 687, Gas Hills ISL Permit, Review of Fall 2006 Well Sampling Report.

work.

Another requirement in the March 5 letter was to upgrade existing monitor wells (to be retained) with protective metal casings with locking caps, pour concrete surface seals around each well, and clearly label every well with its identification. After the current monitor well inventory was completed in June 2008, Lidstone & Assoc. began excavating monitor wells to be upgraded to approximately four feet below ground surface to remove old subsurface concrete seals. Cement forms for both the borehole annulus and the surface apron were then placed. Eight-inch square by five-foot steel protective casings were placed over the existing PVC stick-up well casings, and new annular and surface apron cement seals were poured (see Site Photos 5 and 6). Although the monitor well upgrade work is not yet completed, the steel protective casings will be locked and painted, and well IDs will be either painted and/or stamped onto the casings by October 31, 2008.

During the course of researching the existence and status of project monitoring wells, Cameco and their consultants determined that selected wells were no longer operable or needed for the planned mining operation monitoring. Table 4 includes a column indicating those existing monitor wells that Cameco recommends for plugging and abandonment ("P&A") this year. Existing access roads to some of these locations may require repair to provide even one-time safe access for heavy equipment used for abandonment.

10.0 DRILL HOLE INFORMATION

Cameco commenced delineation and exploratory drilling in August 2007 within the permitted area under Permit No. 687 and adjacent to the permitted area under Drilling Notification 264. Drilling was conducted until mid-December 2007, when it was suspended due to winter weather conditions. The drilling program resumed in March 2008 and is ongoing as of the date of this report. Two-hundred ten (210) holes have been drilled within the permitted area between August 2007 and July 25, 2008 (see Table 1). All drill holes have been plugged and abandoned in accordance with W.S. 35-11-404.

UPGRADE: SAME
MONITOR WELL WITH
PROTECTIVE STEEL
CASING INSTALLED, NEW
CEMENT ANNULAR SEAL
AND SURFACE APRON
POURED (6/19/08).

APPENDIX A

ANNUAL REPORT ATTACHMENT

APPENDIX A

ANNUAL REPORT ATTACHMENT

- A. Please indicate any change in company name or business organization.

Effective November 28, 2007, Power Resources, Inc. is now doing business as (d.b.a) Cameco Resources, a trade name. WDEQ was initially notified of this change in a letter dated November 19, 2007.

- B. List the names and addresses of the following:

1. General Manager: Larry Reimann
2. Party to Receive Notice: Jean Lawlor

- C. List the names and address of all officers, owners and/or controllers. Include titles/positions and beginning and ending dates.

The officers of Power Resources, Inc. d.b.a. Cameco Resources are:

Stephen P. Collings, President, Power Resources, Inc. d.b.a Cameco Resources, 141 Union Blvd, Suite 330, Lakewood, Colorado 80228.

Ted Robinette, Controller, Power Resources, Inc. d.b.a Cameco Resources, 141 Union Blvd, Suite 330, Lakewood, Colorado 80228.

Greg Gabruch, Secretary, Cameco Corp., 2121 - 11th St. West, Saskatoon, Saskatchewan, Canada S7M 1J3.

(list current as of August 08)

APPENDIX B

RECLAMATION SURETY ESTIMATE

APPENDIX B
SURETY ESTIMATE

Permit No. 687 Annual Report
 Gas Hills ISL Project - Cameco Resources

Total Reclamation Cost Estimate

PART I.	BUILDING DEMOLITION AND DISPOSAL COST	\$694,950
PART II.	WELL + HOLE ABANDONMENT COST	\$2,286,002
PART III.	MISCELLANEOUS RECLAMATION COST	\$262,856

Part I. Building Demolition and Disposal

	Carol Shop	Tire Shop	Change House	Air Comp Building	Water Treat Building	BaCl Building
I. Demolition Costs						
Assumptions						
Concrete footings buried in place						
A. Building						
Volume of Building (ft3)	1424625	54560	18600	5000	9000	10368
Demolition Unit Cost per WDEQ Guideline No.12, App	\$0.225	\$0.225	\$0.225	\$0.225	\$0.225	\$0.225
Subtotal Building Demolition Costs	\$320,541	\$12,276	\$4,185	\$1,125	\$2,025	\$2,333
B. Concrete Floor						
Area of Concrete Floor (ft2)	56985	2480	1860	500	600	864
Demolition Unit Cost per WDEQ Guideline No.12, App	\$4.39	\$4.39	\$4.39	\$4.39	\$4.39	\$4.39
Subtotal Concrete Floor Demolition Costs	\$250,164	\$10,887	\$8,165	\$2,195	\$2,634	\$3,793
C. Concrete Footing						
Length of Concrete Footing (ft)	1221	204	184	48	60	48
Demolition Unit Cost per WDEQ Guideline No.12, App	\$15.60	\$15.60	\$15.60	\$15.60	\$15.60	\$15.60
Subtotal Concrete Footing Demolition Costs	\$19,048	\$3,182	\$2,870	\$749	\$936	\$749
Subtotal Demolition Costs per Building	\$589,753	\$26,345	\$15,220	\$4,069	\$5,595	\$6,875
Total Building Demolition Costs	\$647,857					
II. Disposal Costs						
A. Building						
Assumptions						
On-site disposal cost of \$0.54/cy						
Building volume (cy)	52764	2021	689	185	333	384
Disposal Unit Cost (\$/cy)	\$0.54	\$0.54	\$0.54	\$0.54	\$0.54	\$0.54
Subtotal Building Disposal Costs	\$28,493	\$1,091	\$372	\$100	\$180	\$207
B. Concrete Floor						
Area of Concrete Floor (ft2)	56985	2480	1860	500	600	864
Average Thickness of Concrete Floor (ft)	0.833	0.5	0.5	0.5	0.5	0.5
Volume of Concrete Floor (ft3)	47468.505	1240	930	250	300	432
Volume of Concrete Floor (cy)	1758	46	34	9	11	16
Disposal Unit Cost per WDEQ Guideline No.12, App.K	\$8.25	\$8.25	\$8.25	\$8.25	\$8.25	\$8.25
Subtotal Concrete Floor Disposal Costs	\$14,504	\$379	\$284	\$76	\$92	\$132
C. Concrete Footing						
Length of Concrete Footing (ft)	1221	204	104	54	97	117
Average Depth of Concrete Footing (ft)	4	3	3	3	3	3
Average Width of Concrete Footing (ft)	0.75	0.75	0.75	0.75	0.75	0.75
Volume of Concrete Footing (ft3)	3663	459	234	121.5	218.25	263.25
Volume of Concrete Footing (cy)	136	17	9	5	8	10
On-site Disposal Unit Cost per WDEQ Guideline No.12	\$6.44	\$6.44	\$6.44	\$6.44	\$6.44	\$6.44
Subtotal Concrete Footing Disposal Costs	\$874	\$109	\$56	\$29	\$52	\$63
Subtotal Disposal Costs per Building	\$43,871	\$1,579	\$712	\$205	\$324	\$402
Total Building Disposal Costs	\$47,093					
SUBTOTAL DEMOLITION AND DISPOSAL COSTS PER BUILDING	\$633,624	\$27,924	\$15,932	\$4,274	\$5,919	\$7,277
TOTAL BUILDING DEMOLITION AND DISPOSAL COSTS	\$694,950

Part II. Well & Hole Abandonment

I. Monitoring Wells ¹	
Site Location (\$10/site Monitor Wells)	\$10
Removal of the Top Few Feet of Casing	\$15
Sealing of wells using High Solids Bentonite Grout	
(@ 500'depth \$4.00 per ft.)	\$2,000
(@1000'depth \$6.28 per ft.)	\$6,280
Concrete Well Cap @ \$15.00 ea.	\$15
Rough site grading @ \$35/site (2008 Actual)	\$35
Final Site Grading and Seeding (800 ft ²) (2008 Actual)	\$52
Sub total for 500' well	\$2,127
Sub total for 1000' well	\$6,407
88 Existing Monitor Wells (500' or Less)	\$187,176
110 Proposed Monitor Wells for Mine Unit One (500' or less)	\$233,970
Total Monitoring Well Abandonment Costs	\$421,146
II. Production Wells ¹	
Removal of the Top Few Feet of Casing	\$15
Sealing of wells using High Solids Bentonite Grout	
(@ 500'depth \$4.00 per ft.)	\$2,000
(@1000'depth \$6.28 per ft.)	\$6,280
Concrete Well Cap @ \$15.00 ea.	\$15
Sub total for 500' well ³	\$2,030
Sub total for 1000' well	\$6,310
80 Proposed Production Wells(500' or Less)	\$178,640
170 Proposed Injection Wells (500' or Less)	\$345,100
Total Production Well Abandonment Costs	\$523,740
III. Federal No. 32-2 Water Well^{1,2}	
Removal of the Top Few Feet of Casing	\$15
Sealing of wells using High Solids Bentonite Grout	
(@1200'depth \$6.28 per ft.)	\$6,280
Concrete Well Cap @ \$15.00 ea.	\$15
Total Federal No. 32-2 Water Well Abandonment Costs	\$6,310
IV. Delineation Drilling	
Site Location ¹ \$10.00/site	\$10
Sealing of wells using High Solids Bentonite Grout	
(@ 500'depth \$4.00 per ft.)	\$4
(@1000'depth \$6.28 per ft.)	\$6
Rough site grading @ \$35/site (2008 Actual)	\$35
Final Site Grading and Seeding (800 ft ²) (2008 Actual)	\$52
Subtotal for 90 500' holes. (2007 Program)	\$188,730
Subtotal for 35 870' holes.(2007Program)	\$194,621
Subtotal for 150 400' holes (2008 State Lease Drilling)	\$254,550
Subtotal for 135 800' holes.(2008-2009 Program)	\$691,335

Part III. Miscellaneous Reclamation

I. Carol Shop/Office Area	Carol Shop/Office Area
Assumptions	
Concrete, asphalt, and building material used to backfill low areas	
Average haul distance (ft)	2000
Surface grade: Level ground	
A. Topsoil Application	
Topsoil Surface Area (acres)	21
Average Depth of Topsoil (ft)	0.5
Volume of Topsoil (cy)	16940
Topsoil Unit Cost per WDEQ Guideline No.12, App.C (\$/cy)	\$1.34
Subtotal Topsoil Application Cost	\$22,700
B. Discing/Seeding	
Surface Area (acres)	21
Discing/Seeding Unit Cost (\$/acre)	\$500
Subtotal Discing/Seeding Costs	\$10,500
Total Carol Shop/Office Area Reclamation	\$33,200
II. Carol Shop Road	Carol Shop Road
Assumptions	
Surface grade: Level ground	
Average haul distance (ft)	1000
Length of road (miles)	5
Average road width (ft)	50
A. Gravel Road Base Removal	
Gravel Road Base Width (ft)	50
Average Road Base Depth (ft)	0.5
Volume of Road Base (cy)	24444
Removal Unit Cost per WDEQ Guideline No.12, App.C (\$/cy)	\$1.03
Subtotal Gravel Road Base Removal Costs	\$25,153
B. Ripping Overburden with Dozer	
Overburden Surface Area (acres)	30
Ripping Unit Cost per WDEQ Guideline No.12, App.I1 (\$/acre)	\$923.11
Subtotal Ripping Overburden Costs	\$27,693
