			50-327	50-439
			50-328	

REPORTS DEVELOPED BY THE NUCLEAR SAFETY REVIEW STAFF (NSRS) - SUMMARIZATION OF CLOSED REPORTS

Please refer to my letter to you dated September 27, 1985 in which we submitted summarizations of 18 closed NSRS reports as you requested. After review by your staff, we were informed (telephone call from E. G. Adensam) that the summaries did not contain sufficient information for your staff to properly review "the management decision process for addressing or implementing recommendations made in the closed NSRS reports." After further discussions with Ms. Adensam, we have decided to submit the following in lieu of the summaries.

1. A matrix listing of all NSRS reports issued, the recommendations contained in those reports, and the report number that closed each recommendation.
2. Copies of all the remaining NSRS reports (43 open reports were transmitted earlier).

By referring to the matrix and their reviewing actual copies of the reports, your staff can determine how the item was closed and get some indication of our management process that closed the NSRS concern.

REPORTS DEVELOPED BY THE NUCLEAR SAFETY REVIEW STAFF (NSRS) - SUMMARIZATION OF
CLOSED REPORTS

This method of your staff reviewing the actual closed report is more direct than a third party within TVA summarizing the method of closure of the reports and possibly adding additional interpretation of the closure process.

We will submit the matrix and remaining reports by November 25, 1985.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

H. G. Parris, Manager
Power and Engineering (Nuclear)

Subscribed and sworn to before me
this 6th day of November 1985.
