Gentlemen:

In the Matter of the Application of)
Tennessee Valley Authority) Docket Nos. 50-390
50-391

WATTS BAR NUCLEAR PLANT (WBN) UNITS 1 AND 2 - PROPOSED PHYSICAL SECURITY PLAN
(PSP) DRAFT REVISION O-P REVISED PAGES (TAC NO M63657)

Pursuant to 10 CFR 50.34(c), the enclosure provides corrected pages to the WBN proposed PSP (Revision O-P) submitted by letter dated March 15, 1994. These corrected pages address the new hand geometry equipment that is being added to enhance the access control system. The NRC was informed of this enhancement in a letter dated October 24, 1994. These corrections are the result of conversations with Mr. Gene McPeck of the NRC. There are several additional pages included that were revised as a result of minor editorial changes. These editorial changes do not modify previous commitments in the PSP. Changes to each page are denoted by a revision bar in the margin or at the page number to show pagination. Also included is a summary listing of the revisions for easy comparison against the replaced pages.

Enclosed are six copies (Nos. 6 through 11) assigned to NRC. The information is being sent by registered mail and the signed receipt will signify that you have received this information and acknowledged that it contains safeguards material to be protected in accordance with 10 CFR 73.21. This receipt will also be taken as verification to TVA that the superseded WBN PSP pages have been destroyed and replaced by the enclosed.
