Attn: Mr. James P. O'Reilly, Regional Administrator  
101 Marietta Street, NW, Suite 2900  
Atlanta, Georgia 30323

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - SPURIOUS VALVE OPERATION DUE TO FIRE  
DAMAGE - WBRD-50-390/84-39, WBRD-50-391/84-34 - THIRD INTERIM REPORT

The subject deficiency was initially reported to NRC-OIE Inspector  
Dave Verrelli on July 30, 1984 in accordance with 10 CFR 50.55(e) as NCR  
5760. Our first interim and final reports were submitted on August 24 and  
September 27, 1984.

Please note that this report supersedes our previously submitted final report.  
Due to changes in TVA's 10 CFR 50 Appendix R safe shutdown analyses, the  
reported corrective action for this deficiency may no longer be accurate. As  
such, TVA is still in the process of investigating the subject deficiency. We  
expect to submit our next report on or about January 25, 1985.

If you have any questions, please get in touch with R. H. Shell at  
FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
