|--|--|---|

LICENSEE:
 The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

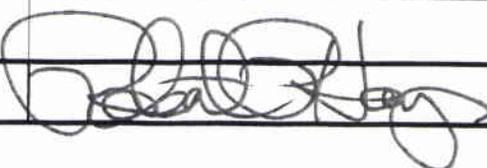

_____ Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

- 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
 (Violations and Corrective Actions)

[Handwritten signature]

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Main Office Inspection Next Inspection Date: July 2013

Field Office _____

Temporary Job Site Inspection _____

PROGRAM SCOPE

The licensee is authorized to possess and use portable moisture density gauges at temporary job sites anywhere in the United States where the NRC maintains regulatory jurisdiction. The license has 3 employees qualified and use the portable moisture gauges at landfills for density measurements of clay overlays. The gauges are used infrequently (last used October 2007) and are not stored at temporary job sites or at an employee's residence. At the time of the inspection, none of the gauges were being used at a temporary job site.

Performance Observations

During the inspection, the inspector reviewed and discussed with the RSO: (1) Two tangible barriers required for gauge security and padlocks , (2) DOT requirements, hazmat recertification and tests; (3) refresher training for gauge users; (4) dosimetry and records; (5) leak tests and inventories; (6) security of licensed material at each authorized storage facility; (7) survey meter availability; and (8) emergency procedures.
