Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30323

Dear Mr. O'Reilly:

In accordance with the provisions of 10 CFR 50.54(a)(3)(iv), enclosed is Revision 8 to TVA's Topical Report, TVA-TR75-1A, "Quality Assurance Program Description for Design, Construction, and Operation of TVA Nuclear Power Plants." Revision 3 review copies were submitted to you by letter dated September 7, 1984. Your staff's review of Revision 8 is not completed; however, TVA has decided to distribute Revision 8 before the NRC review because the new organizational description is needed by TVA and NRC staff. There are very few editorial corrections in the enclosure as compared to the submitted review copy. This submittal has been discussed with and concurred in by Charles M. Upright of your staff.

The purpose of this revision is to reflect the organizational changes in TVA's nuclear power program. These organizational changes are extensive and include a reorganization of the quality assurance organization. Therefore, Revision 8 completely revises Section 17.0, "TVA Organizations Participating in the Quality Assurance Program," and revises most organizational references in the document. Revision 8 republishes the entire document and includes a set of section dividers (with tabs) to be incorporated into each copy.

The results of your review of Revision 8 will be incorporated either into an amended Revision 8 or a Revision 9, as appropriate.

If you have any questions concerning this matter, please get in touch with D. L. Lambert at FTS 858-2733.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
