U.S. Nuclear Regulatory Commission  
Region II  
Attn: Mr. James F. O'Reilly, Regional Administrator  
101 Marietta Street, NW, Suite 2900  
Atlanta, Georgia 30323

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - INADEQUATE SEPARATION OF SHUTDOWN SYSTEM  
CABLES - WBRD-50-390/84-37, WBRD-50-390/84-40, AND WBRD-50-391/84-35 - SECOND  
INTERIM REPORT

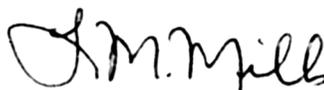

The subject deficiency was initially reported to NRC-OIE Inspector  
Dave Verrelli on July 30, 1984 in accordance with 10 CFR 50.55(e) as NCR  
WBN EEB 8422 and 5761. A final report was submitted on August 27, 1984.

Please note that this report supersedes our previously submitted final  
report. Due to changes in TVA's 10 CFR 50 Appendix R safe shutdown  
analyses, the reported corrective action for this deficiency may no longer  
be accurate. As such, TVA is still in the process of investigating the  
subject deficiency. We expect to submit our next report on or about  
January 25, 1985.

If you have any questions, please get in touch with R. H. Shell at  
FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
