Thank you for the response to my previous FOIA request number 2008-0283. By sending this e-mail, I am making a new request for any written records in the possession or control of the agency that were created since April 1, 2008 and that relate to the review of either of the metal fatigue analyses for the recirculation nozzles at Oyster Creek nuclear power plant . If any of these records contain deliberative or proprietary information, please redact that material and provide the rest of the record. In the event that records that are responsive to this request are in the possession or control of the agency, but not in the public domain, please provide a log stating why each such record cannot be released.

Thanks very much.
