(52-31329-01)

Dear Sir or Madam:

Please find enclosed a new application for the use and handling of radioactive materials.

If your need any further information, please feel free to contact me at (787) 252-2155.

Sincerely,

٠,٠

÷.,

Herfor the drogen Marie

President

Item No. and Title	Response
 Individual(s) responsible for the radiation safety program and their training and experience – Radiation Safety Officer. Name: Waldemar Rosado Casicing for individuals 	Before obtaining licensed material, the proposed RSO will have successfully completed one of the training courses described in Criteria in the section entitled "individuals(s) Responsible for Radiation Safety Program and Their Training and Experience- Radiation Safety Officer" in NUREG-1556, Vol 1, Rev. 1 dated November 2001.
 8 Training for individuals working in or frequenting Restricted areas. 	Before using licensed materials, authorized users will have successfully completed one of the training course described in Criteria in the section entitled "Training for Individuals Working In or Frequenting Restricted Areas" in NUREG-1556, Vol 1, Rev. 1 dated November 2001.
9. Facilities and equipment.	No information needs to be submitted in response to this item; key issues are addressed under "Radiation Safety Program – Public Dose" and "Radiation Safety Program – Operating and Emergency Procedures."
 Radiation Safety Program – Audit Program. 	The applicant is not required to, and should not, submit its audit program to NRC for review during the licensing phase.
 Radiation Safety Program – Termination of activities. 	The applicant is not required to submit a response to the termination of activitics section during the initial application. However, when the license expires when the licensee ceases operation, NRC Form 314 must be submitted.
 Radiation Safety Program – Survey Instrument. 	We will either possess and use, or have access to and use, a radiation survey meter that meets the Criteria in the section entitled "Radiation Safety Program – Instruments" in NUREG-1556, Vol 1, Rev. 1 dated November 2001.

 Radiation Safety Program – Material Receipt and Accountability. 	Physical inventories will be conducted at intervals not to exceed 6 months, to account for all scaled sources and devices received and possessed under the license.
 Radiation Safety Program – Occupational Dosimetry. 	Either we will maintain, for inspection by NRC, documentation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of 10 percent of the allowable limits in 10 CFR Part 20, or we will provide Dosimetry processed and evaluated by an NVLAP approved processor that is exchanged at a frequency recommended by the processor.
 Radiation Safety Program – Public Dose. 	The applicant is not required to submit a response to the public dose section during the licensing phase. This matter will be examined during an inspection.
 Radiation Safety Program – Operating and Emergency Procedures. 	Operating and emergency procedures will be developed, implemented, and maintained and will meet the Criteria in the section entitled "Radiation Safety Program – Operating and Emergency Procedures" in NUREG-1556, Vol 1, Rev. 1 dated November 2001
 Radiation Safety Program – Leak Test. 	Leak tests will be performed at intervals approved by the NRC or an Agreement State and specified in the sealed Sources and Device Registration Sheets. Leak tests will be performed by an organization authorized by NRC or an Agreement State to provide leak testing services for other licensees or using a leak test kit supplied by an organization authorized by NRC or Agreement State to provide leak tests kits to other licensees and according to the kit supplier's instructions.
 Radiation Safety Program – Maintenance. 	Routine Cleaning and Lubrication We will implement and maintain procedures for routine maintenance of our gauges according to each manufacturer's recommendations and instructions.
	Non-Routine Maintenance We will send the gauge to the manufacturer or other person authorized by the NRC or an Agreement State to perform non- routine maintenance or repair operations that require the removal of the source or source rod from the gauge.
 Radiation Safety Program – Transportation. 	The applicant is not required to submit a response to transportation during the licensing process. However, this issue will be reviewed during an inspection.
 Waste Management – Gauge Disposal and Transfer. 	The applicant is not required to submit a response to waste management during the licensing process. However, the licensee should develop, implement, and maintain gauge transfer and disposal procedures in its radiation protection program.
