Attention: Dr. J. Nelson Grace, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30323

Dear Dr. Grace:

WATTS BAR NUCLEAR PLANT UNIT 2 - FAILURE OF LIMITORQUE MOTOR OPERATORS
DURING VALVE CLOSURE - WBRD-50-391/82-18 - SUPPLEMENTAL FINAL REPORT

The subject deficiency was initially reported to NRC-OIE Inspector R. V. Crlenjak on January 26, 1982 in accordance with 10 CFR 50.55(e) as NCR 3793 R1. Our last supplemental final report was submitted on August 6, 1985. Below is our supplemental final report. We consider 10 CFR Part 21 applicable to this deficiency.

Due to delays in receipt of material, the October 28, 1985 date for completion of corrective action was not met. These corrections will be completed before fuel load for unit 2.

Al Ignatonis was informed of this revision to our schedule on October 31, 1985.

If there are any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

R. L. Gridley
