Attention: Dr. J. Nelson Grace, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30323**

Dear Dr. Grace:

**WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - OPERATING CONDITIONS USED IN PIPING
ANALYSIS - WBRD-50-390/82-52, WBRD-50-391/82-49 - SUPPLEMENTAL FINAL REPORT**

The subject deficiency was initially reported to NRC-OIE Inspector R. V. Crlenjak on May 18, 1982 in accordance with 10 CFR 50.55(e) as NCR WBN CEB 8215. Our final report was submitted on March 15, 1984. This constitutes our supplemental final report.

The date of January 31, 1986 for completion of the corrective actions indicated in our final report was not met. This item has been rescheduled because it is not required to support fuel load, and engineering resources have been concentrated on items required before fuel load. This corrective action will be completed by July 31, 1986.

This revision to our schedule was discussed with Bob Carroll on January 30, 1986.

If there are any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
