Attn: Mr. E. William Brach
Division of Spent Fuel Storage and Transportation
Office of Nuclear Material Safety and Safeguards

Subject: Request for Closed Meeting to Discuss the Security Assessment Findings for
Spent Fuel Storage Casks

Docket Nos.: 72-1015 and 72-1025

Reference: NRC Letter to Kent Cole, Dated July 22, 2008

Dear Mr. Brach,

In response to the above referenced letter, NAC International (NAC) hereby requests participation in a closed, Safeguards meeting to discuss the spent fuel storage security assessment findings. NAC requests Safeguards Information (SGI) to be presented and discussed at the meeting under the conditions described in the above referenced letter. NAC is willing to participate with the other vendors in this meeting, however would like to request an additional separate discussion with the NRC to address any NAC design unique considerations. In addition, NAC is also willing to participate in a public meeting if that is NRC's preferred forum.

The following NAC personnel will be attending the requested meeting:

- Craig Seaman, Senior Vice President, Engineering and Projects
- Thomas A. Danner, Vice President, Engineering
- Charlie Pennington, Vice President, Marketing

The above named individuals have been fingerprinted for FBI identification and criminal history records check and hold DOE "Q" Clearances. They are key NAC personnel intimately familiar with NAC spent fuel storage cask designs representing NAC's interest. Due to their key role, they all have a "need to know" for SGI related to the security assessment findings for spent fuel storage casks.

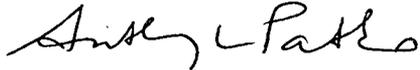

Please notify NAC when the above individuals have been cleared to receive and/or discuss SGI. NAC understands that the NRC staff will issue an Effective Immediately Order to NAC imposing appropriate SGI protection requirements.
