Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNIT 1 - NRC REGION II LETTER RII:JAM
50-390/80-13 - SUPPLEMENTAL INFORMATION

The subject letter dated May 27, 1980 cited TVA with two infractions concerning preoperational testing and quality control procedures. TVA's response to those infractions was provided on June 23, 1980. A revised response was submitted on May 5, 1981.

In our revised final report, TVA committed to review previously performed hydrostatic tests and flushes to determine acceptability and retest those which are not acceptable by February 1, 1982. However, as discussed with Inspector R. V. Crlenjak on February 1, 1982, TVA now expects this work to be completed by hot functional testing.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein to be complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
