Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - DOCUMENTATION OF ELECTRICAL TESTING - WBRD-50-390/81-72, WBRD-50-391/81-68 - SUPPLEMENTAL INFORMATION

The subject deficiency was initially reported to NRC-OIE Inspector R. V. Crlenjak on August 28, 1981 in accordance with 10 CFR 50.55(e) as NCR 3575R. Our final report was submitted on September 28, 1981.

In our final report TVA committed to complete corrective actions by January 4, 1982. However, as discussed with Inspector R. V. Crlenjak on December 23, 1981, TVA is extending the commitment date to April 15, 1982. This was due to the initial underestimation of man-hours required to complete corrective actions.

If you have any questions concerning this matter, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
