Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - REVIEW AND UPDATING OF PIPING
DRAWINGS - WBRD-50-390/82-71, WBRD-50-391/82-66 - SUPPLEMENT INFORMATION

The subject deficiency was initially reported to NRC-OIE Inspector R. V. Crlenjak on June 21, 1982 in accordance with 10 CFR 50.55(e) as NCR WBN QAB 8204. Interim reports were submitted on July 10, and November 1, 1982 and March 29, 1983. Our final report was submitted on September 30, 1983.

As discussed with NRC-OIE Inspector P. E. Fredrickson on October 27, 1983, the date of October 31, 1983 for completion of corrective actions indicated in our final report on this matter would not be met. The original amount of man-hours necessary to complete this item was underestimated. All drawings have been revised. Approximately five percent still need to be squadchecked and issued. The corrective action on this matter will be completed by November 30, 1983.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
