Region II
Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - NRC OIE BULLETIN 79-14 -
SEISMIC ANALYSES FOR AS-BUILT SAFETY-RELATED PIPING SYSTEM

During a telecon with NRC-OIE Region II representatives on August 16, 1983, TVA committed to provide the NRC with a copy of Special Engineering Procedure (SEP) 82-25 R1. The SEP describes TVA's programs for implementation of NRC-OIE Bulletin 79-14 Phase II inspections at Watts Bar Nuclear Plant unit 1. For unit 2, the SEP will be reissued, but the Phase II inspections for unit 2 will be conducted using the same method described for unit 1.

Please note that the information (figure 2) transmitted to NRC Inspector J. York by telex on July 19, 1983, no longer represents TVA's program for implementation of Bulletin 79-14 Phase II inspections. Also, we request that NRC review of TVA's position be performed expeditiously to ensure prompt resolution of this matter.

If you have any questions concerning this matter, please get in touch with R. H. Shell at extension FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
