Subject: Tantalum Source Materials -- Th + U content

Mike:
See attachment for final tabulation of analytical results...

(Please note that the previous Th and U values for New Haven Lot # 949-10 - 2, sample # 7, have been changed (the numbers had been transposed).

Russ Foster

DESCRIPTION OF PACKAGING
(INCLUDE TYPE OF CONVEYANCE)

This material consist of 2110 (8 and 15 gallon) drums approximately (454,060) lbs / 227.03 s.t.
A 2.66 oz sample was taken from (6) seperate random selected drums for a total weight of 1 - LBS.
This sample is being shipped to Aberdeen, MD for testing, per shipping release 1 - F New Haven, requested by, Mr. Melvin Lee Phone # 703- 607- 3207.
Radioactive testing was accomplished during and after sampling. The average reading were, with drums open and closed, X0.4mr/hr USING A E- 120 SET AT x0.1, however during, SAMPLING ONE SAMPLE DRUM TESTED X0.8 mr/hr.
SEE ATTACHED RADIOACTIVE MONITORING REPORT.

DESCRIPTION OF PACKING (INCLUDE TYPE OF CONVEYANCE)

Tantalum/Columbium Concentrates per procedure the sampling was accomplished IAW memorandum dated Oct 29,1996 including all attachments.
The following quantity of lot / batches were sampled
Lots 1 through 60 starting from the first batch on the listing which will be reflected on th DLAH-35 on receiving a P.O.and laboratory instructions.

See attached page # 2 for lot and batch information and safety information.

DISTRIBUTION OF SAMPLES (GIVE COMPLETE ADDRESS)

Note: 60 ea.
Labatory Samples on hold for laboratory information.

Note: 60 ea.
Reserve Samples stored at New Haven Depot

DESCRIBE METHOD OF INSPECTION, SAMPLING AND/OR SAMPLE PREPARATION (USE ATTACHED SHEETS, IF NECESSARY)

A sample thief was used to take three (3) equal increments from each sample container and combined to make one (1) gross lot, the gross sample was thoroughly mixed and riffled down to one (1) 1/2 lb laboratory and one (1) 1-1/2 lb reserve sample, each sample was placed in a double clean plastic bag and identified with a DLAH 34 label.
All samples are on hold at New Haven Depot in need of a P.O. and laboratory instructions.

DESCRIPTION OF PACKING (INCLUDE TYPE OF CONVEYANCE)

Tantalum/Columbium Concentrates per procedure the sampling was accomplished IAW memorandum dated Oct 29,1996 including all attachments.
The following quantity of lot / batches were sampled
Lots 1 through 60 starting from the first batch on the listing which will be reflected on th DLAH-35 on receiving a P.O.and laboratory instructions.

See attached page # 2 for lot and batch information and safety information.

DISTRIBUTION OF SAMPLES (GIVE COMPLETE ADDRESS)

Note: 60 ea.
Labatory Samples on hold for laboratory information.

Note: 60 ea.
Reserve Samples stored at New Haven Depot

DESCRIBE METHOD OF INSPECTION, SAMPLING AND/OR SAMPLE PREPARATION (USE ATTACHED SHEETS, IF NECESSARY)

A sample thief was used to take three (3) equal increments from each sample container and combined to make one (1) gross lot, the gross sample was thoroughly mixed and riffled down to one (1) 1/2 lb laboratory and one (1) 1-1/2 lb reserve sample, each sample was placed in a double clean plastic bag and identified with a DLAH 34 label.
All samples are on hold at New Haven Depot in need of a P.O. and laboratory instructions.

QAS

Date: 8-Nov-96

To: Frederic W, Brooks

Refer To : DNSC-MQWA/E

Subject: Columbium Tantalum Sampling

The sampling can commence at your discretion with five (5) days notice to QA as to date storage would like to start, after work area is setup with necessary QA and storage equipment.

When we start sampling it will require a minimum of two (2) warehouse workers to remove and return drums to storage, remove, clean drum cover if required with HEPA, vacuum and small spills that may occur, remove cover and rings from containers and replace after sampling is complete.

Estimated lead time to finish project will be limited to available man hours in storage, QA, lot preparation and relocation after sampling.

QA will need a drill and a 1" deep well socket / short extension an extension cord for drill, a small 3' ladder/platform to get to top of auger to accomplish the operation. The auger is 44-1/2 " long plus length of drill, plus drum height. Storage normally supplies equipment to accomplish depot requirements..

Health Precautions:

Reviewing MSDS
Wear gloves
Safety glasses
Wear respirator with type " H" high efficiency filters cartridge
Use TLD's badges / pocket dosimeters as appropriate as on previous sampling tasks
Protective imperious clothing
Utilization of Decontamination facilities
Store waste in container, monitor for disposal
Splitter will be contained in a plastic bag during the operation to keep any dust in the area of operation
Sampling procedure was distributed on 29Oct96 to all concerned MQWE revised 11/7/96. but will be discussed at safety meeting

Move work table to material location

QA 's will moved test equipment and scales to work location.

Warehouse Location of material
Whse - 214-3 - 9, 13, 14, 15, 16, 17, 26, and 28
Whse - 214-4 -11, 21, 31, 41, 42, 45, 51 and 61

Subject: columbium tantalum sampling
---------- Message Contents ----------

Clarence and Bill,
See attached memo from Fred. I feel this is a good plan, we will have to work together to accomplish this sampling. If you have any questions or concerns just give me a call.

Cam

---------- Forward Header
Subject: columbium tantalum sampling
Author: FREDERIC BROOKS at CCPO14
Date: 11/13/96 9:48 AM

Good Morning Cam.
In reference to your message dated 12 Nov 96. I feel the best way to approach this task would be for me to assign (2) material handlers to MQWE for the duration of this project. MQWE would be responsible for directing the material handlers on which tantalum to pull and location and quantity.

MQWE will insure that the material handlers assign to this project are provided with a work plan and directions so as not to delay the sampling project.
I would appreciate a pre-startup meeting with all material handlers and MQWE,this is needed in the event I would have to switch out personnel for some unforeseen reason.
This is a Q function which I will support 100%, but I will not take part in any decision making as far as the sampling procedures, nor will any of my staff.
addendum:
Storage will supply tools and equipment less Q's special equipment to accomplished task.
Once material is sampled, said material will be place back into original location.

Startup date,week of 18 Nov 96,with 24hrs headsup from MQWE.If you have any questions please call.
I concur with all other items listed on MQWE plan dated 8 Nov 96, if you have any questions, please call.
Fred

15. REMARKS (Review all other appropriate questions contained in "guide for the inspection of stockpiled materials and storage facilities, " and, if deficiencies are found, give the apprpriate guide numbers and complete details in this block)

The computed count of (2,110) drums is three (3) drums more than what is recorded on the 46 record card.
Some of the material was redrumed prior to the shippment from Crane Depot to New Haven Depot.
A total of (347) drums remain in this area , some drums have not been identified to weather they are either Columbium or Tantalum ty
"Radioactive Material" signs are posted.
Radioactive material report attached.

16. RECOMMENDATIONS (Not to be construed by storage depot or facility as authorization to proceed with remedial measures beyond the scope of usual authority)

That this material remain in this area until identification for tags and marking is completed.

Combined with 3526 with 15 Jul 96 DMW

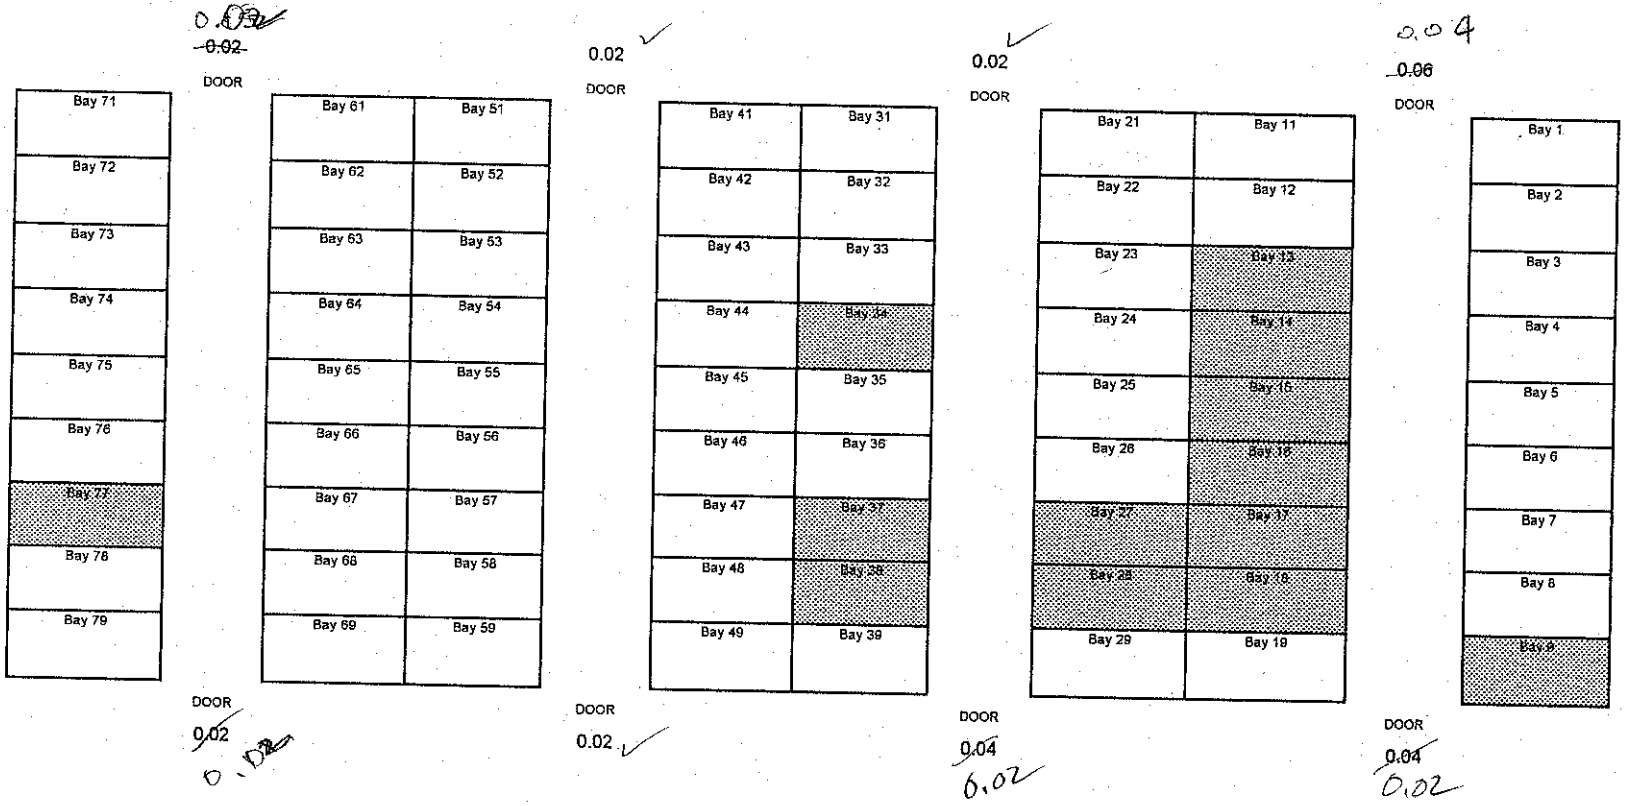
READINGS TAKEN AT WAREHOUSE EXIT DOORS
(Readings in mR/hr)
WAREHOUSE 214, SECTION 3



NOTIFICATION OF STOCKPILE INSPECTION

1. NAME & LOCATION OF DEPOT OR FACILITY	2. NAME AND TYPE OF COMMODITY	3. SERIAL NO.
DLA/DNSC Depot New Haven, Indiana	Annual Radiological Report	6 4.CODE

5A. Date of Last Inspection	6. TYPE OF STORAGE AND SPECIFIC DEPOT AREA	
08 Apr 97		
5B. Date of This Inspection	OUTSIDE STORAGE:	Zirconium Ore Piles 111 and 111-A
06 May 98	INSIDE STORAGE:	Warehouse 214, Sections 3 and 4

7. NAME AND TITLE OF PERSON RESPONSIBLE FOR MATERIAL	7A. TEL. NO. OR CODE	7B. EXTENSION
Mr. Frederic W. Brooks, Depot Manager	(219)749-5953	N/A

INSPECTION DATA (Check and complete. Explain negative responses) N/A		YES	NO
8. STORAGE	A. Storage Facilities Are of the Type Prescribed in the Storage Manual		
	B. Storage Facilities are Maintained in Good Order		
9. MATERIAL	A. Material Is Stored In the Manner Prescribed in the Storage Manual		
	B. Material Is Free of Deterioration, Infestation, Contamination, Commingling, Migration and Erosion		
10. RECORDS	A. Depot Manager Confirmed that all entries have been Posted		
	B. Depot Postings indicate last RR No. dated ; Last OSR No. dated		
11. UNITS	Quantity Indicated in 14h reflects Depot Posting and agrees with actual and/or computed count		
12. SECURITY AND FIRE PROTECTION	Security and Fire Protection are being provided in accordance with Quality Assurance and Material Inspection Handbook And Storage Manual Requirements		
13. CONTAINERS PILES, OR OTHER UNITS	A. Material is Stored in Proper Containers *(Check only if applicable)*		
	B. All Containers, Piles and/or Units Are Marked as Prescribed in the Storage Manual		
	C. Condition of Containers *(Give exact number in Class III under remarks)*	(1) Class I %	(2) Class II % / (3) Class III %

14. DESCRIPTION OF CONTAINERS, PILES, OR OTHER

PROGRAM a.	TYPE(*Pile, case, ingot, bale, etc.*) b.	Nominal Size Width c.	Length d.	Height e.	Diameter f.	g. AVERAGE W (1) Gross	i. Total Weight (1) Gross	(2) Net

ATTN: Bill Tull QAS

15. REMARKS *(Review all other appropriate questions contained in "guide for the inspection of stockpiled materials and storage Facilities," and, if deficiencies are found, give the appropriate guide numbers and complete details in this block)*

SEE CONTINUATION SHEETS

15. RECOMMENDATIONS *(Not to be construed by storage depot of facility as authorization to proceed with remedial measures beyond the scope of usual authority)*

SEE CONTINUATION SHEETS

17. DISTRIBUTION		
	[1] DNSC-MQ	[1] SUPERVISORY QA
	[1] ORIGINATING DEPOT	[4] OTHER(SPECIFY) DNSC-MQBI,ME,MQBR,MQNH
