Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - HENRY PRATT BUTTERFLY VALVE
DEFICIENCY - WBRD-50-390/82-115, WBRD-50-391/82-107, HTRD-50-518/82-23
HTRD-50-520/82-23 - SUPPLEMENTAL FINAL REPORT

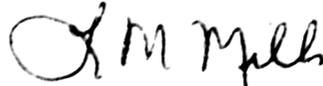

The subject deficiency was initially reported to NRC-OIE Inspector
R. V. Crienjak on November 9, 1982 in accordance with 10 CFR 50.55(e) as
NCRs WBN MEB 8205 and HTN MEB 8205. Interim reports were submitted on
December 7, 1982 and June 2, 1983. Our final report was submitted on
August 8, 1983. We consider 10 CFR Part 21 applicable to this deficiency.

As discussed with NRC-OIE Inspector Paul Fredrickson on August 30, 1983,
the date of September 12, 1983 for completion of corrective actions
indicated in our final report on this matter will not be met. The TVA
contract engineer on this matter sent preliminary drawings to the site with
his verbal approval. However, site procedures require formally approved
drawings to draw up appropriate work plans. This formal documentation is
being sent to the site. The corrective action on this matter will be
completed by October 28, 1983.

If you have any questions, please get in touch with R. H. Shell at
PTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
