Dear Dr. Grace:

WATTS BAR NUCLEAR PLANT UNIT 2 - SUPPORT DESIGNS DO NOT MEET REQUIREMENTS -
WBRD-50-391/84-07 - SECOND SUPPLEMENTAL REPORT

The subject deficiency was initially reported to NRC-OIE Inspector Dave Verrelli on February 10, 1984 in accordance with 10 CFR 50.55(e) as NCR WBN WBP 8408. Our last report on this item was submitted on September 16, 1985. This constitutes our second supplemental final report.

As discussed with Al Ignatonis on January 6, 1986, the date of January 30, 1986 for completion of the corrective actions indicated in our final report was not met. Due to higher priority, unit 1 work on this item had to be rescheduled. The corrective actions will be complete by January 2, 1987.

If there are any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,
