U.S. Nuclear Regulatory Commission  
Region II

Attn: Mr. James P. O'Reilly, Regional Administrator  
101 Marietta Street, NW, Suite 2900  
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - UNDOCUMENTED MINOR MODIFICATIONS TO  
STRUCTURAL AND MISCELLANEOUS STEEL - WBRD-50-390/82-54, WBRD-50-391/82-51 -  
SUPPLEMENTAL INFORMATION

The subject deficiency was initially reported to NRC-OIE Inspector  
R. V. Crlenjak on May 10, 1982 in accordance with 10 CFR 50.55(e) as NCR  
WBN 4093R. Interim reports were submitted on June 18, and September 29,  
1982. Our final report was submitted on February 25, 1983.

In our final report the date of April 1, 1983 was specified for the  
completion of corrective actions for unit 1. However, as discussed with  
NRC-OIE Inspector P. Fredrickson on March 30, 1983, the date of April 1,  
1983 was not met. The rework associated with this NCR is more complex  
than originally anticipated and much of the work is being performed in  
areas where accessibility is hindered by congestion. The corrective  
actions for unit 1 are now scheduled to be completed by July 15, 1983.

If you have any questions, please get in touch with R. H. Shell at  
FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
