

A circular black and white stamp. The word "RECEIVED" is at the top. Below it is the date "OCT 13 1981". At the bottom, it reads "U.S. NUCLEAR REGULATORY COMMISSION". The outer ring of the stamp contains numbers from 1 to 24, representing hours of the day.

SUBJECT: CURRENT SCHEDULING OUTLOOK: DIVISION OF ENGINEERING

Except for EQ the following plants have no issues which are likely to require Office Director level attention or to impact current schedules:

- ✓ Grand Gulf 1
- ✓ Susquehanna 1
- ✓ Zimmer 1
- ✓ Shoreham 1
- ✓ Calloway 1
- ✓ Cunanche Peak 1
- ✓ Waterford 3

The following three plants have issues which may require Office level attention. These plants and the substantive issues are as follows:

Diablo Canyon 1 & 2

It is not clear if the breakwater issue will have a schedular impact. We met with PG&E recently and have clarified our mutual understanding of the issues and actions involved. A late October meeting should provide more definitive information on how and when the problem will be resolved for a full-power OL.

Watts Bar 1

We met with Watts Bar on the soil liquefaction problem. They have promised a timely review of possible remedial actions and schedule for implementation.

- 2 -

Fermi 2

Fermi "fire in the control room" problem should be nearing resolution. Staff has given Fermi some options and is awaiting Fermi response.

MEMORANDUM FOR: Harold R. Denton, Director
Office of Nuclear Reactor Regulation

FROM: Richard H. Vollmer, Director
Division of Engineering

SUBJECT: CURRENT SCHEDULING OUTLOOK: DIVISION OF ENGINEERING

The following summarizes the current scheduling outlook for the next ten cases and measures being taken to minimize or eliminate any schedule impacts. Since I anticipate that the outlook will not change significantly from week to week, I request your concurrence on a report on the first and fifteenth of each month which will focus on changes from the previous report. Of course, any significant potential schedule impact which arises will be quickly brought to your attention.

Except for EQ the following plants have no issues which are likely to require Office Director level attention or to impact current schedules:

Grand Gulf 1
Susquehanna 1
Zimmer 1
Shoreham 1
Calloway 1
Comanche Peak 1
Waterford 3

The following three plants have issues which may require Office level attention. These plants and the substantive issues are as follows:

Diablo Canyon 1 & 2

It is not clear if the breakwater issue will have a scheduler impact. We met with PG&E recently and have clarified our mutual understanding of the issues and actions involved. A late October meeting should provide more definitive information on how and when the problem will be resolved for a full-power OL.

Watts Bar 1

We met with Watts Bar on the soil liquefaction problem. They have promised a timely review of possible remedial actions and schedule for implementation.
