**SUBJECT: NuScale Power Request for Pre-Application Review Meeting
NRC Docket #: 0769**

REFERENCE:

1. NuScale Power, Inc. Pre-Application Meeting, July 24, 2008. ADAMS ML082130430.
2. Memorandum To: William D. Reckley, U.S. NRC, From Thomas J. Kenyon, U.S. NRC, Summary of Pre-Application Kickoff Meeting with NuScale Power Inc., on the NuScale Reactor Design and Proposed Licensing Activities, August 7, 2008, ADAMS ML082140333

As indicated in our pre-application meeting with NRC staff on July 24, 2008 (Reference 1 and 2), NuScale Power would like to schedule our second pre-application meeting during the first quarter of FY 2009. The objective of the meeting is to discuss our safety analysis Codes and Methods. We would appreciate a meeting with NRC during the week of November 17-21, 2008.

In preparation for our discussions, we intend to submit two technical reports to the NRC. The first is a proprietary report describing the NuScale plant design. This document will provide NRC staff with useful background information. The second document is a technical report on NuScale's safety analysis Codes and Methods. We intend to submit these documents two weeks prior to the meeting.

We look forward to hearing from you regarding a meeting date and look forward to very productive discussions.

Sincerely,

Paul Lorenzini
Chief Executive Officer
