

## Vogle PEmails

---

**From:** Williams, Dana M. [DANAWILL@SOUTHERNCO.COM]  
**Sent:** Friday, August 22, 2008 11:38 AM  
**To:** Christian Araguas; Scott Flanders; William Burton; Mark Notich; Gerald McCoy  
**Cc:** Davis, James T.  
**Subject:** SNC Letter AR-08-1286 transmitting VEGP ESP Response to RAI #11 Involving Groundwater (Part 2 of 2)  
**Attachments:** AR-08-1286\_RAI Ltr #11 Hyd\_Resp\_FINAL\_PART 2.pdf

> An electronic copy of Southern Nuclear's letter, AR-08-1286, dated  
> August 21, 2008 is attached. In addition, a hard copy has been  
> transmitted to the NRC Document Control desk via FedEx.

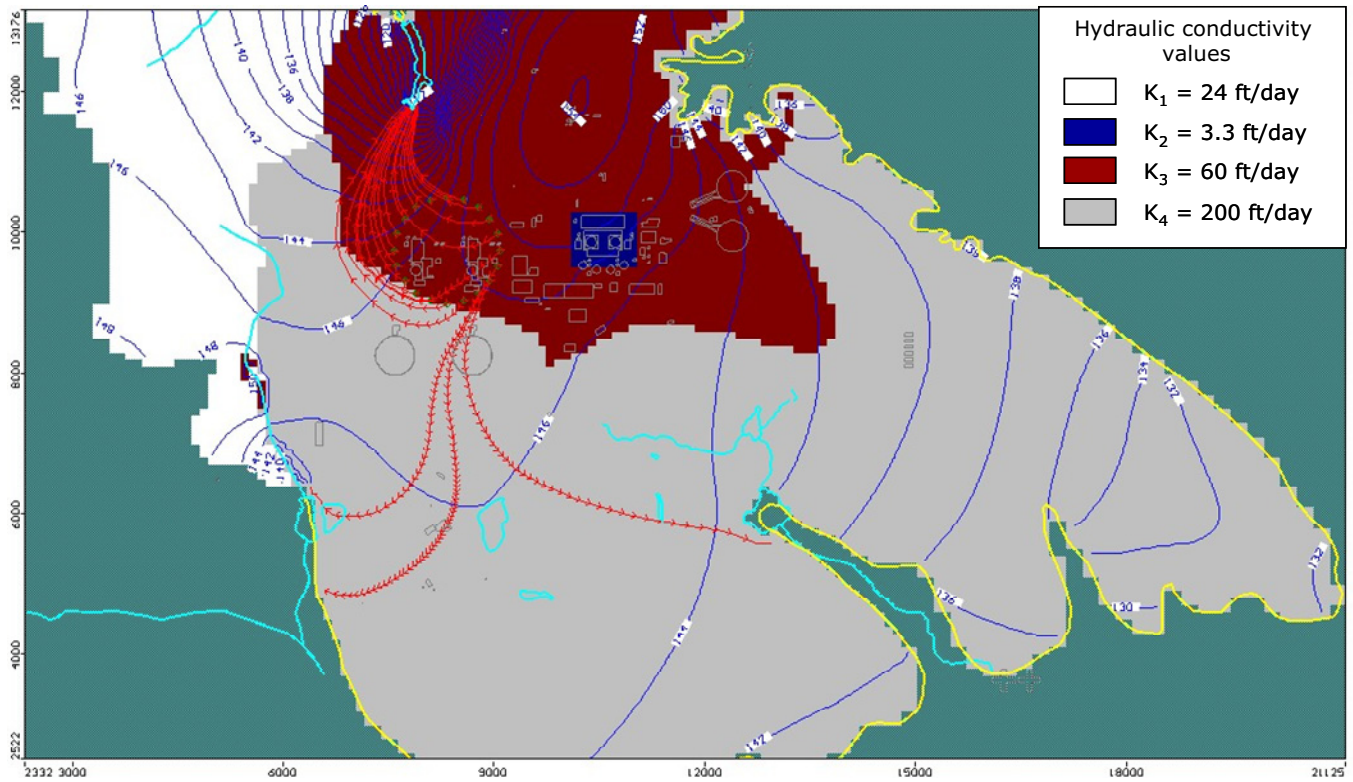

Figure 10 - Simulated heads and particle tracking for a hydraulic conductivity distribution that produces groundwater pathways to the south.

Figure 11 - Comparison of observed and computed heads for the hydraulic conductivity distribution shown in Figure 10.

Figure 12 - Simulated heads and particle tracking for a hydraulic conductivity distribution that produces groundwater pathways to the south.

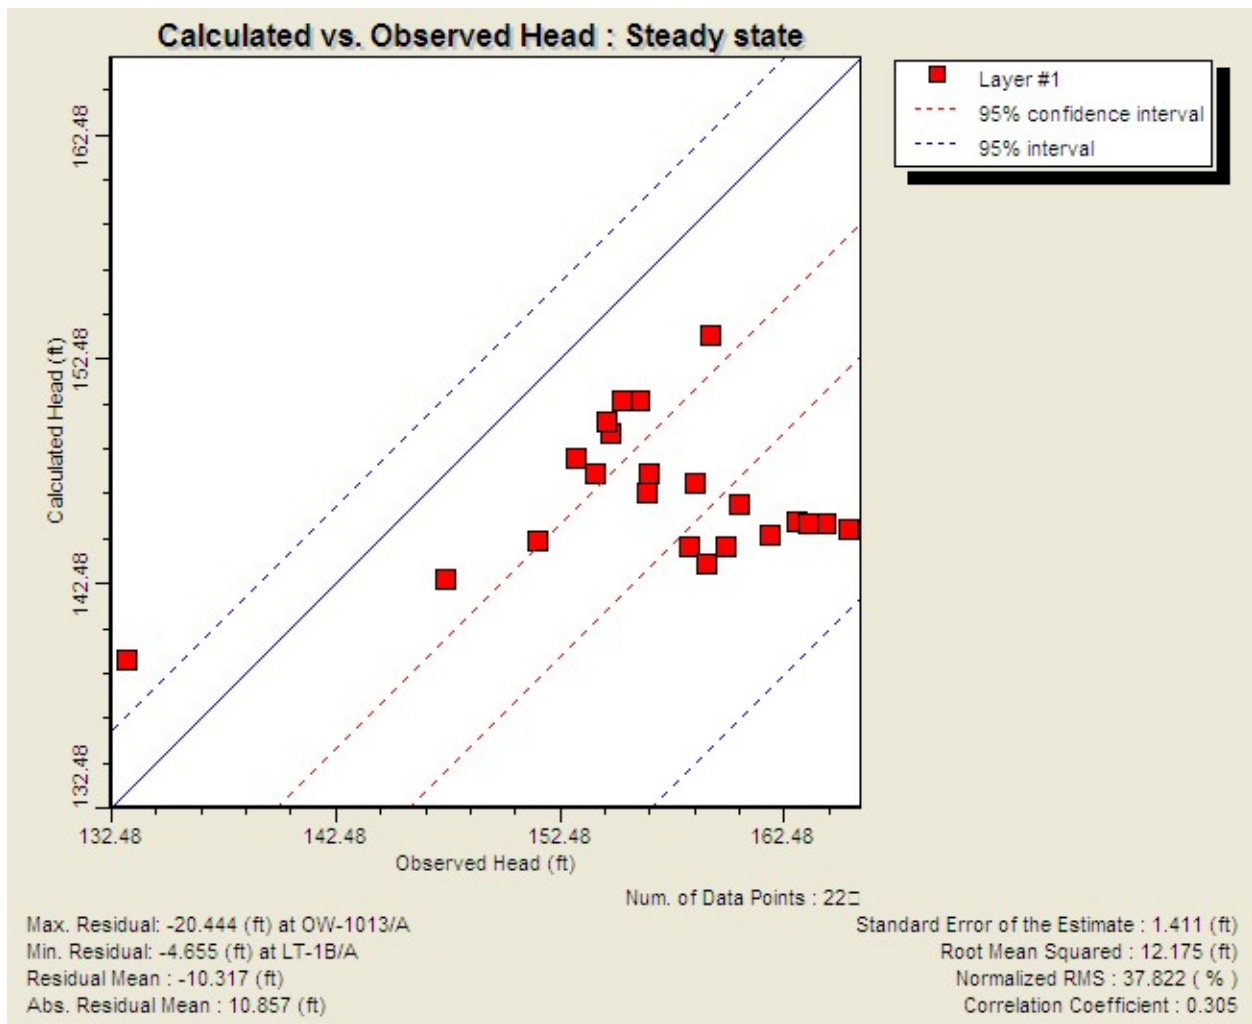

Figure 13 - Comparison of observed and computed heads for the hydraulic conductivity distribution shown in Figure 12.

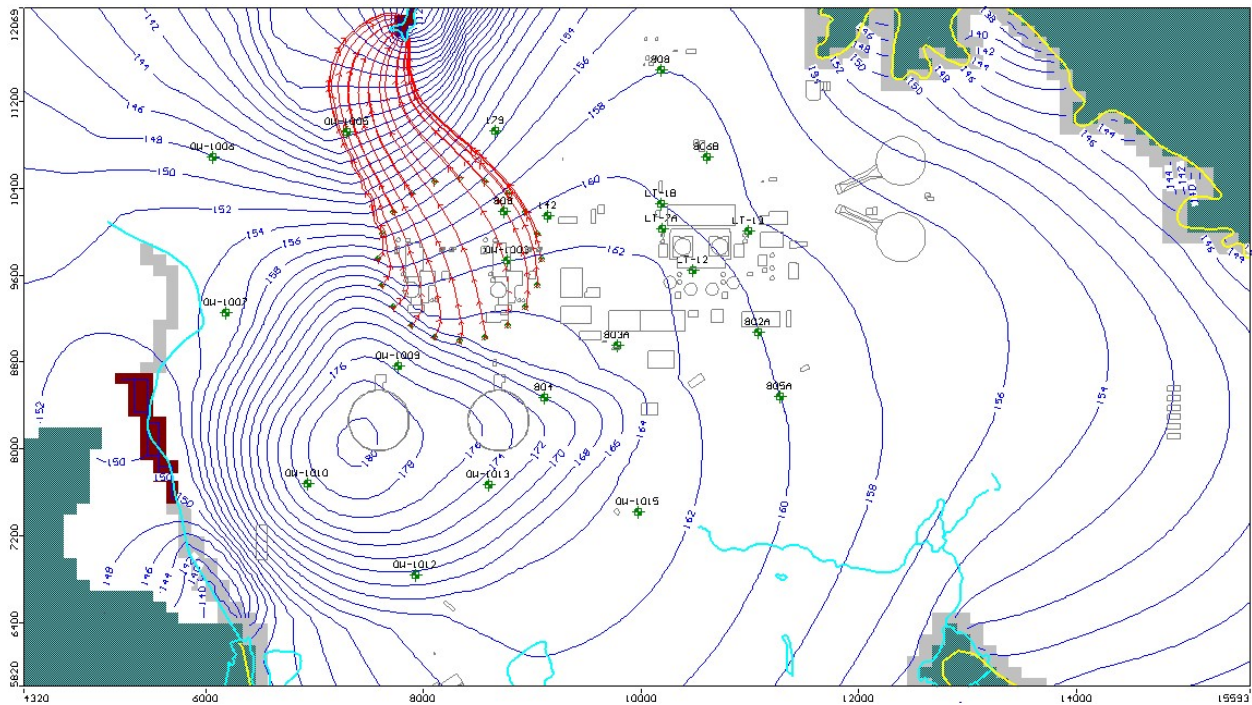

Figure 14 - Simulated heads and particle tracking with the baseline model, using the recharge distribution shown in Figure 9, and increasing the recharge in zone R<sub>7</sub> to 48 in/yr.

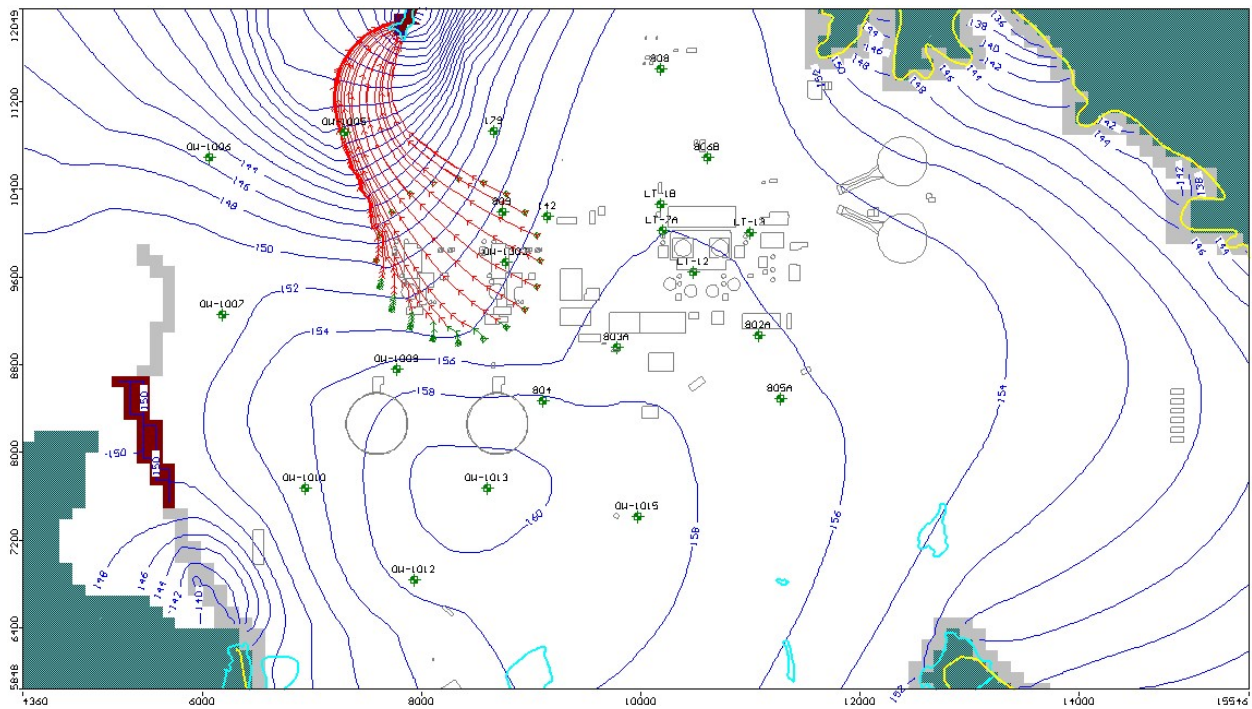

Figure 15 - Simulated heads and particle tracking with the baseline model, using the recharge distribution shown in Figure 9, and decreasing the recharge in zone R<sub>7</sub> to 0 in/yr.

Figure 16 - Hydraulic conductivity zones for post-construction conditions.

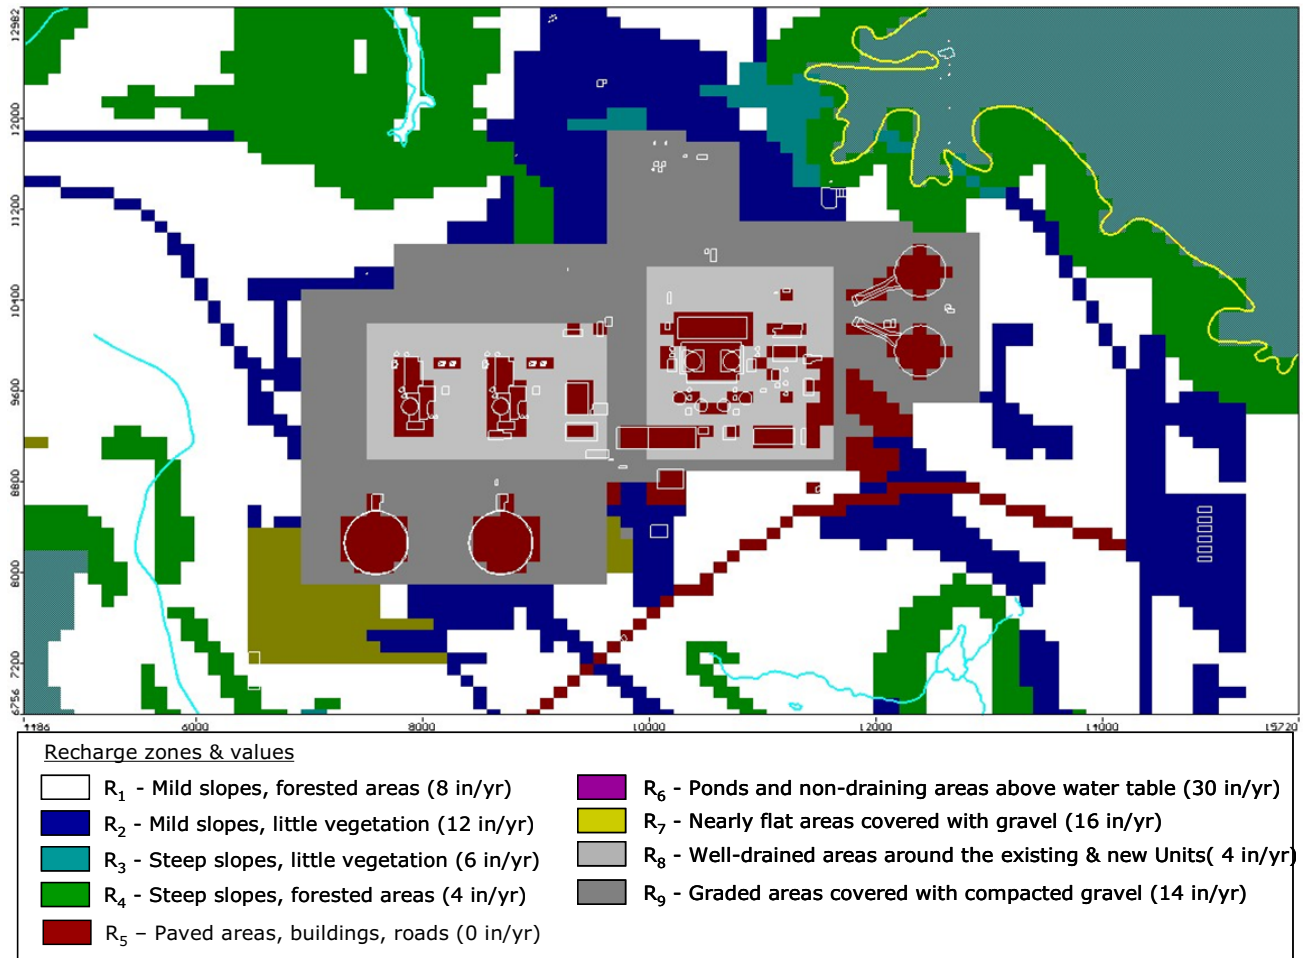

Figure 17 - Recharge zones for post-construction conditions

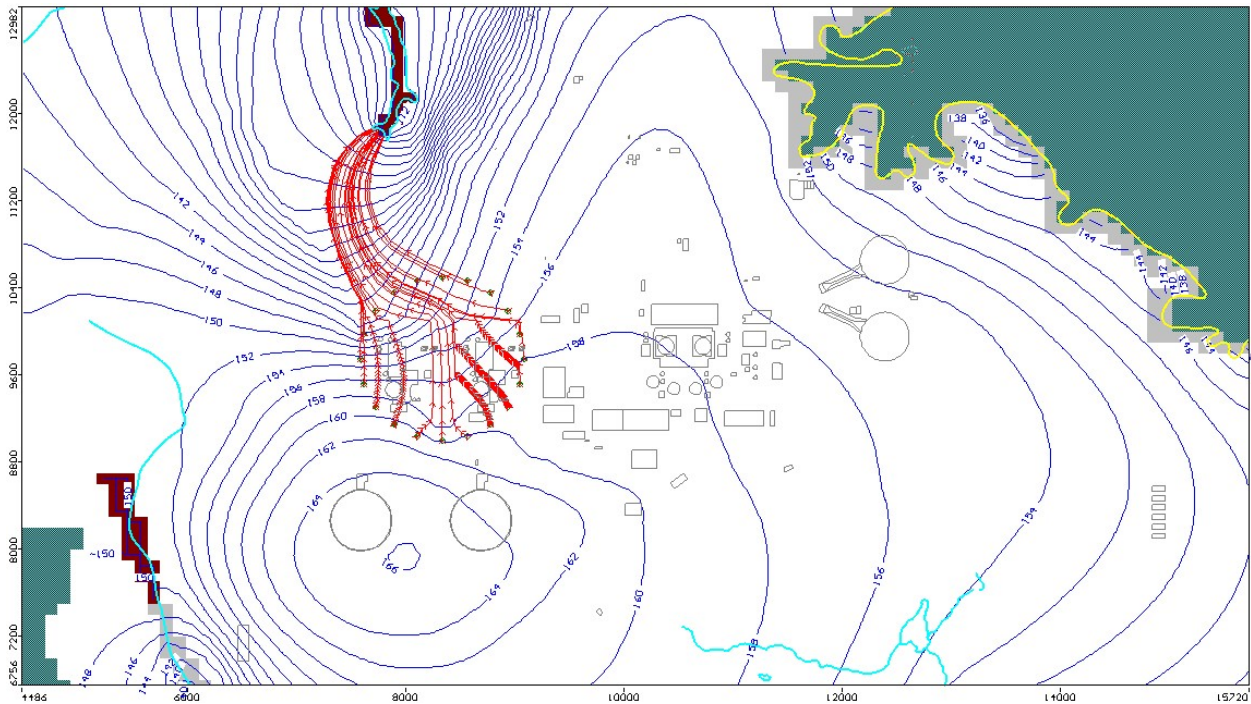

Figure 18 - Particle tracking under post-construction conditions. 20 particles are released along the periphery of 750-ft radius circle around the power block

Figure 19 - Particle tracking under post-construction conditions. A particle is released at the auxiliary building of Unit 4.

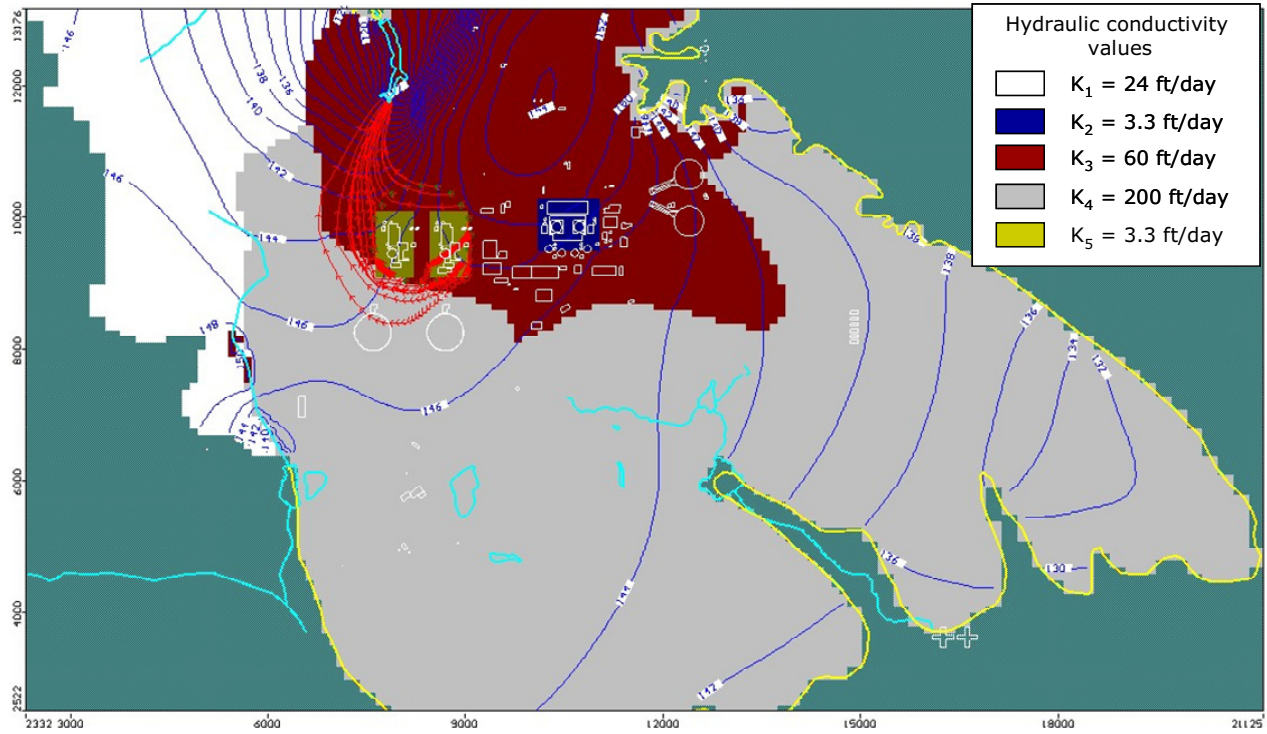

Figure 20 - Particle tracking for post-construction conditions using the same hypothetical high conductivity zone as in the simulation of Figure 10

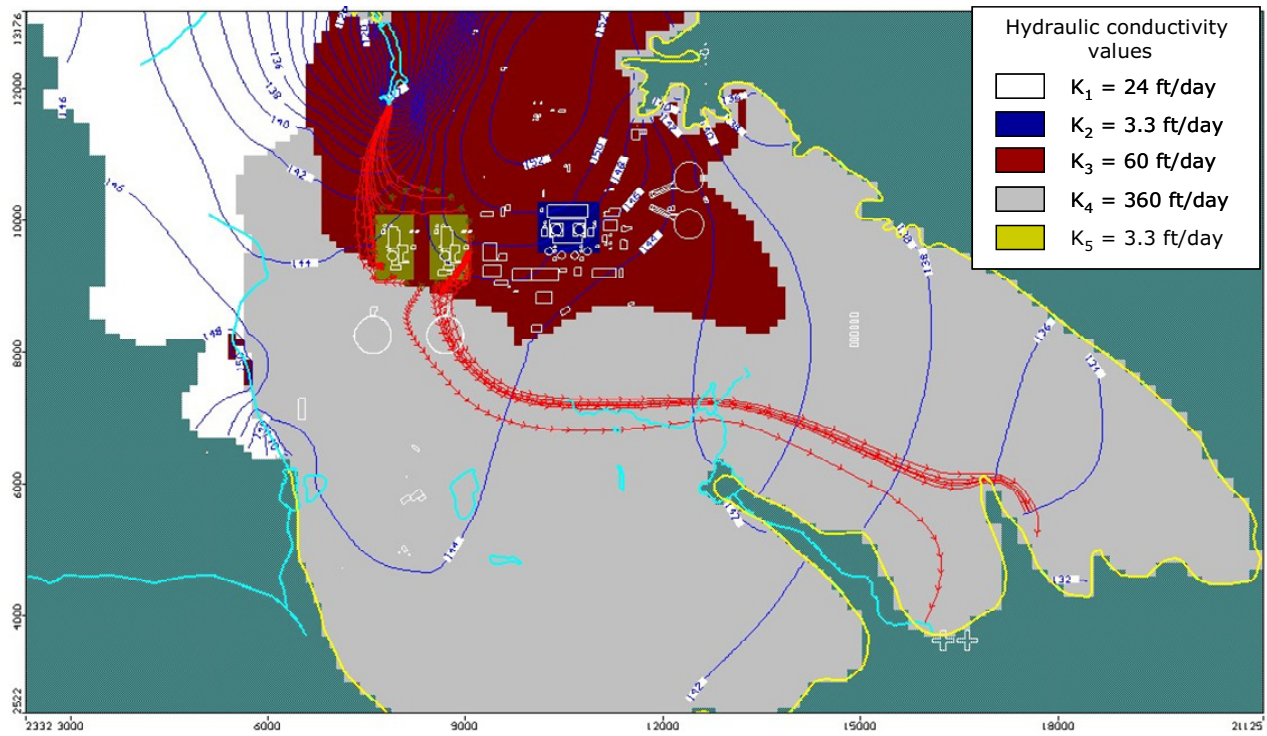

Figure 21 - Particle tracking for post-construction conditions using the same hypothetical high conductivity zone as in the simulation of Figure 12
