Atlanta, Georgia 30323

Dear Dr. Grace:

**WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - FAILURE TO DOCUMENT DESIGN BASIS
CHANGES FOR FIRE DAMPERS - WBRD-50-390/85-15 AND WBRD-50-391/85-16 -
SUPPLEMENTAL FINAL REPORT**

The subject deficiency was initially reported to NRC-OIE Inspector Al Ignatonis on March 4, 1985 in accordance with 10 CFR 50.55(e) as NCR WBN MEB 8513. Our final report was submitted on March 21, 1985. Below is our supplemental final report.

As discussed with NRC-OIE Region II Inspector Al Ignatonis on September 25, 1985, the date of September 1, 1985 for completion of corrective actions indicated in our final report was not met. Because of the recent emphasis on reviewing environmental qualifications of safety related equipment, issuance of the affected system description has been delayed. The corrective action on this matter will be completed by March 14, 1986.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
