Re: Dominion Nuclear Power, LLC; North Anna Power Station Combined
License Application
Federal register # 73FR12760

I am writing on behalf of the Louisa County Board of Supervisors regarding the environmental scoping process for the North Anna Power Station, Unit 3 combined License application.

At its April 7, 2008 meeting, the Board wished to express their support of Unit 3 but wanted to communicate concerns about the impact Unit 3 will have on Louisa County.

In August 2006, the Board submitted items of concern to Dominion Virginia Power and the Virginia Department of Environmental Quality. These items are still of great concern for the Board and are as follows;

The first item is the number of workers and residents using Route 652, Kentucky Springs Road. It is our understanding that North Anna Power Station employs approximately 800 permanent workers and every 18 months brings in an additional 1,000 workers during its outages. If Unit 3 is approved, there would be a need for approximately 2,000 employees during the construction phase. When Unit 3 is complete and operational, North Anna Power Station would employ approximately 1,500 full time employees and still require additional workers every 18 months.

There are dozens of multi-lot subdivisions along Route 652. The Waters Subdivision is a 400 lot development within a few miles of the plant. Cutalong is a mixed use development, that at full build out, will have over 1,000 dwellings, a golf course and commercial retail space at the intersection of Route 652 and Route 208.

There will be severe traffic congestion with that many people traveling a two-lane country road. While there will be long economic benefits to the County, those effects will not be felt until construction of Unit 3 begins and well thereafter. Louisa County needs to know what Dominion Power is doing for the increase of vehicles on Route 652?

Dominion has stated that it would be willing to work cooperatively with state and county governments to facilitate planning decision to minimize transportation impacts to avoid congestion and they would develop a construction management traffic plan prior to the start of construction. If widening Route 652 to handle the massive increase in traffic is required, planning needs to begin now.

Secondly, there would be a major influx of new people into Louisa County resulting in the need for new schools. Louisa County is currently building a new elementary school that will house 700 students. Even with the addition of this school, our elementary system will still be at maximum capacity. Louisa County Public Schools is currently working on a school construction plan, but needs more information about the impact of Unit 3 for that plan.

The County understands that because of the nature of the construction industry, with a variety of employee skill sets required, many employees will be transient but Louisa County has a tremendous wealth of attractants that many employees may make Louisa their permanent home. Since energy is a national priority, with a focus on nuclear energy, then possibly school construction grants can be provided by the Federal government to assist with new school construction. Again, if we are not prepared for the impact on our community's infrastructure, the County will have to play catch up, which will cost more in the long run.

Lastly, is the impact Unit 3 will have on Lake Anna. The Lake Anna region has been designated a growth area in the County's Comprehensive Plan. In view of the annual low water level in Lake Anna and potential needs for water sources in the immediate future, Louisa County has recently begun a study to identify potential water supplies for our citizens. Lake Anna and its tributaries have been identified as potential water resources for this ever-growing population center of our County.

The Board has consistently supported Dominion's application for the construction and operation of Unit 3 at the North Anna Nuclear Power Station however the foregoing issues need to be adequately addressed. This expansion will clearly be an economic benefit to the County in the future as well as other Dominion Power customers but it will also create strain on infrastructure requirements. We simply want our concerns heard and for plans on how to best handle these issues to begin soon.

Sincerely,

C. Lee Lintecum
County Administrator
