I will be sure to let them know. One thing I must point out is, I am not aware of any guidance they might actually be drafting. I was thinking more in terms of how new and significant is described in the rule (CFR), ESRP, and Reg Guide 4.1. I could be wrong though, they might be putting something together.

Thanks...what would we do without those guys!

Please just let them know about the Safety spin as well - they may not be thinking about SERs/FSARs when they draft the guidance.

Would it make any sense for me to meet with them before they release their guidance to make sure the Safety issues are included?

Chris

Not sure just yet. I plan to talk with Andy and Barry (gurus) to make sure we have everything covered in terms of direction for the reviewers to follow for New and Significant. Ill keep you posted.

Alicia,
I want to brief the NRC & PNNL hydrologists before our Safety Site audit on April 10 and 11. When do you think this guidance will be available for us to review?

I'm also going to suggest that they follow the same guidance for Grand Gulf Safety.

Thanks,
Chris

Chris & Andrea:

Follow up to our recent discussion. I phoned Alicia W for info. Alicia is gathering available guidance, including current wisdom from Kugler & Zalcman, and plans to brief staff & contractors involved in the environmental audit. We are added to the invitation list.

Chris - for "safety" review, I prefer not to add/modify guidance Alicia will provide for the environmental review.

Thanks.
Tom
