Docket Nos. 50-327
50-328
50-390
50-391

SEQUOYAH NUCLEAR PLANT (SQN) UNITS 1 AND 2; WATTS BAR NUCLEAR PLANT (WBN)
UNITS 1 AND 2 - MAIN STEAM LINE BREAK (MSLB) INSIDE ICE-CONDENSER CONTAINMENT

Reference: John A. Zwolinski's letter to S. A. White dated August 27, 1987
"Main Steam Line Break (MSLB) Inside Ice-Condenser Containment
(TAC 00199,00200)"

The referenced letter requested TVA comments on the Los Alamos National Laboratory (LANL) report "Evaluation of Revised LOTIC-3 Drain-Flow Heat Transfer Models." In accordance with our conversations with Rajender Auluck, we understand that a meeting with NRC has been scheduled for November 23, 1987, to obtain needed clarification on a number of the technical issues identified in this report. Subsequent to this meeting, a schedule for providing our comments on the LANL report will be submitted to you.

If you have any questions, please call D. L. Williams at (615) 632-7170.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
