

IDR 5 Watts Bar.

Dear Dr. Shirley Ann Jackson,

I am writing to you concerning the low energy operating license that has been issued to the Watts Bar Nuclear Plant. I am hoping that you are fully aware of the fact that there is currently no place in the U.S. to securely store spent nuclear fuel. I am asking you to please not issue Watts Bar a full operating license. This nuclear plant already has a history of safety hazards. I am concerned about my future. Watts Bar is a lemon.

Sincerely,

Madeline Carroll  
YRUV of Fresno
