

November 26, 1995

Dr. Shirley Ann Jackson, chairperson
Nuclear Regulatory Commission
Washington, DC 20555-0001

Dr. Shirley Ann Jackson:

The licesense you may issue that allows low energy ~~reactor~~ operating to Watts Bar Nuclear Plant is an outrage. The previous safety hazards associated with this plant, as well as the 8 billion dollars of taxpayer money spent on this plants problems, should be more than enough to discourage your approval. Do not pass this full operating liscense

As a member of the youth population in this country, I feel strongly that efforts should be made to ensure a safe and positive environment for future generations.

The lemon enclosed is to remind you of the sour deeds this licesense may be responsible for.

Respectfully,

Jade Harris
Livingston
