

Estimated burden per response to comply with this mandatory collection request: 4.4 hours. Submittal of the application is necessary to determine that the applicant is qualified and that adequate procedures exist to protect the public health and safety. Send comments regarding burden estimate to the Records and FOIA/Privacy Services Branch (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to infocollects@nrc.gov, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0120), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

MANUFACTURING PROCEDURE	
SUBJECT: Handling and Storage of Radioactive Materials	Number : 52879-0000-42 Revision: D
RELATED DOCUMENTS	JQSGU-002 Element 7.0

I. PURPOSE

To specify how to handle radioactive materials and how to use survey or Geiger Counter for detecting radiation.

II. APPLICABILITY

This procedure applies to all JAMCO America, Inc. (JAMCO) departments that handle, use, store, assemble and test radioactive devices. This procedure also covers the inspection for radioactive material contamination and supercedes Inspection Procedure IP-M-U010.

III. RESPONSIBILITY

Radiation Safety Officer (Primary) or QA Manager (Back-up)

Responsible for training affected personnel to ensure that the requirements of this procedure are met and the results documented.

Department Managers/Supervisor

Responsible for defining training plans and coordinating training of all personnel affected by this procedure.

IV. DEFINITIONS

Background Radiation

Natural radiation that is always present. Usually from the sun's heat and light.

Radiation

Energy that moves in the form of waves or particles.

Alpha (α) Particles

A particle emitted by radioactive nuclei, which consists of two protons and two neutrons.

Gamma (γ) Rays

Powerful radiation waves that are similar to x-rays.

Curie (Ci)

The unit used to measure radiation.

Half-Life

The time it takes half the atom of a radioactive substance to decay to another form.

REM

A measure of effect of radiation on humans, incorporating doses and types of radiation

VI. PROCEDURE

1. Radioactive Material Facts
 - 1.1. Americium-241 (241Am)
 - 1.2. Radiant Rays (Alpha and Gamma)
 - 1.3. Half-Life (433 Years)
 - 1.4. Intensity (0.7 Ci for each Smoke Detector)
2. Handling of Radioactive Smoke Detectors
 - 2.1. Smoke detectors shall be assembled, disassembled, and handled by authorized personnel.
 - 2.2. Do not eat or drink while working with smoke detectors.
 - 2.3. Do not remove smoke detectors from the designated storage and manufacturing areas.
 - 2.4. Only trained personnel shall handle smoke detectors.
3. Inspection Using Survey Meter For Weekly Contamination Test
 - 3.1. Use either Victoreen Model 290 (SN443) or Technical Associates' Model PUG-7(SN006465), and set-up per their respective equipment manual.
 - 3.2. Selecting 5 random locations on the workbench (Location A) and 3 random locations in the storage cabinet (Location B), the mechanic:
 - 3.2.1. Measure radioactive contamination.
 - 3.2.2. Record results on *UQ-005, Periodic Radiation Inspection Form*
 - 3.2.3. Acceptable measurements shall be less than two time (2X) background radiation. If measurements exceed thresholds, follow Section 4.0 below.
 - 3.2.4. Submit report to the QA Manager for review and retention.
4. Accident/Emergency
 - 4.1. Contamination occurs when the reading at the workstation exceeds the background reading (normally taken in the parking lot of the facility or outside the building) by 2X.
 - 4.2. The Radiation Safety officer will ensure that there is a survey meter in good operating condition in the area where the radiation will be used, including plastic gloves, foot cover and whole body suits, if required.
 - 4.3. Control access to a contaminated area by establishing an exclusion zone. Detour traffic around the area until a radiation survey indicates it is safe and contamination-free. Do not remove any contaminated material until it has been properly surveyed and released.
 - 4.4. Verify that (206)-NUCLEAR has been called and reached.
 - 4.5. If skin or superficial contamination of wounds happened, wash thoroughly with running water and soap, blot dry.
 - 4.6. If eyes are contaminated, treat by irrigating with lots of water for at least five full minutes.
 - 4.7. If contaminated internally, induce vomiting to eliminate quickly, induce sneezing and blow nose repeatedly. Note: Do not attempt these procedures

unless you have proper medical training. Also, contact a hospital or physician as soon as possible.

5. Biological Effect

- 5.1. At the warehouse, 10 detectors are packed into a cardboard box. Their dimensions 5.5cm height, 9.5cm width and 22cm length. The shipping box (46cm x 30cm x 30cm) holds 30 cardboard boxes. The external radiation of the shipping box is of nearly negligible dosage rate.
- 5.2. The maximum external radiation dosage of a person, who is engaged 50 weeks per year is 5000mREMs.

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

OCTOBER 11, 2007

JAMCO AMERICA, INC.
1018 80TH STREET, SW
EVERETT, WA 98203

License No. 46-23247-01E
Expiration Date: 01/31/2008
Program Code: 03255

Gentlemen:

SUBJECT: NOTICE OF LICENSE EXPIRATION

Your U.S. Nuclear Regulatory Commission (NRC) license, specified above, will expire on the date shown.

If you wish to continue your licensed program, you should prepare and submit a renewal application on NRC Form 313, following regulations (10 CFR Parts) and licensing guidance (NUREG 1556, Volume/s) listed for your program in Enclosure 3. NRC strongly encourages the use of NUREG-1556 guidance documents because they supercede much of the guidance previously used for licensing. Further, these documents will make preparation of your renewal application and the NRC staff's review easier and quicker. If the application reflects any significant changes in your licensed program, those changes must be clearly indicated.

You must submit an application for the renewal of your license at least 30 days before the expiration date on the license. If your renewal application is filed (delivered or post-marked) before the expiration date, NRC will use discretion and your license will remain in effect until NRC takes final action on your application.

However, if your renewal application cannot be filed before the expiration date, you should contact NRC immediately to see if you can obtain a temporary extension of the expiration date. Without NRC approval of that extension request, your license expires on the expiration date stated on the license. If your license expires, you no longer have a valid license, but you are required to maintain all licensed materials in safe, locked storage until your application for a license or request for termination is submitted and approved. Use of the licensed material after the expiration of your license may subject you to criminal and/or civil sanctions.

If you do not wish to renew your license, you must dispose of or transfer all licensed radioactive material in your possession in an authorized manner (see the appropriate requirements in 10 CFR 30.36, 40.42, or 70.38); then complete the enclosed Form NRC-314, "Certificate of Disposition of Materials" and return it before the expiration date of your license, with a request that your license be terminated. If you cannot dispose of or transfer all licensed radioactive material in your license before the expiration date, you must request a license renewal, for "storage only", of the radioactive material, to avoid enforcement action for violations involving the possession of licensable material without a valid license. Enforcement action may include a substantial monetary civil penalty that could also include daily civil penalties until you achieve compliance.

This notice of your license expiration is sent for your convenience only and does not mean that similar notices will be sent in the future. The responsibility for timely submission of the license renewal remains with the licensee. If you have any questions about this notice or license expiration/renewal, please contact the NRC Regional Office that handles your license.

Estimated burden per response to comply with this mandatory information collection request: 30 minutes. This submittal is used by NRC as part of the basis for its determination that the facility has been cleared of radioactive material before the facility is released for unrestricted use. Forward comments regarding burden estimate to the Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to the Paperwork Reduction Project (3150-0028), Office of Management and Budget, Washington, DC 20503. If an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

A. MATERIALS DATA (Check one and complete as necessary)

THE LICENSEE OR ANY INDIVIDUAL EXECUTING THIS CERTIFICATE ON BEHALF OF THE LICENSEE CERTIFIES THAT:
 (Check and/or complete the appropriate item(s) below.)

1. NO MATERIALS HAVE EVER BEEN PROCURED OR POSSESSED BY THE LICENSEE UNDER THIS LICENSE.
- OR
2. ALL ACTIVITIES AUTHORIZED BY THE LICENSE HAVE CEASED AND ALL MATERIALS PROCURED AND/OR POSSESSED BY THE LICENSEE UNDER THE LICENSE NUMBER CITED ABOVE HAVE BEEN DISPOSED OF IN THE FOLLOWING MANNER. (If additional space is needed, use the reverse side or provide attachments.)

Describe specific material transfer actions and, if there were radioactive wastes generated in terminating this license, the disposal actions including the disposition of low-level radioactive waste, mixed waste, Greater-than-Class-C waste, and sealed sources, if applicable.

For transfers, specify the date of the transfer, the name of the licensed recipient, and the recipient's NRC license number or Agreement State name and license number.

If materials were disposed of directly by the licensee rather than transferred to another licensee, licensed disposal site or waste contractor, describe the specific disposal procedures (e.g., decay in storage).

B. OTHER DATA

1. OUR LICENSE HAS NOT YET EXPIRED; PLEASE TERMINATE IT.
2. A RADIATION SURVEY WAS CONDUCTED BY THE LICENSEE TO CONFIRM THE ABSENCE OF LICENSED RADIOACTIVE MATERIALS AND TO DETERMINE WHETHER ANY CONTAMINATION REMAINS ON THE PREMISES COVERED BY THE LICENSE.
- NO (Attach explanation)
- YES, THE RESULTS (Check one)
- ARE ATTACHED, or
- WERE FORWARDED TO NRC ON (Date)
