Caveats: FOUO

Betsy,

During the review of the most recent Edgewood Chemical Biological Center's NRC license amendment, Amendment 47 dated August 11, 2008, I noticed a typographical error under condition 6.D. This same condition under Amendment 46 was 6.B and said "Any byproduct material with atomic numbers 1 through 95". Under Amendment 47, this same condition was modified to say, "Any byproduct material with atomic numbers 1 through 83".

This email is requesting that condition 6.D under Amendment 47 should be changed back to say "Any byproduct material with atomic numbers 1 through 95".

Very Respectfully,  
Eric Kujala
