NRC Letter Dated: August 6, 2008

NRC Review of Final Safety Analysis Report

NRC RAI NUMBER: 03.02.02-03

SRM dated July 21, 1993 concerning SECY-93-087 identified that the staff will review passive plant design applications using the newest codes and standards endorsed by the NRC and unapproved revisions to the codes will be reviewed on a case by case basis. Editions of various codes and standards referenced in DCD Subsection 3.2.6 are not current and newer codes and standards are not referenced in COLA Subsections 3.2 or 1.8.

The applicant is requested to clarify if any different or current codes and standards are applied to the design and procurement of site-specific SSCs, other than those identified in the DCD.

BLN RAI ID: 1115

BLN RESPONSE:

The applicant intends to implement the DCD identified codes and standards. Other than those identified in the DCD, the codes and standards applied to the design and procurement of the nonsafety-related site-specific SSCs are those identified and discussed in various subsection of the FSAR (where requested by Regulatory Guide 1.206).

This response is expected to be STANDARD for the S-COLAs.

ASSOCIATED BLN COL APPLICATION REVISIONS:

No COLA revisions have been identified associated with this response.
