MEMORANDUM TO: Robert O. Hardies, Chief  
Component Integrity Branch  
Division of Engineering  
Office of Nuclear Regulatory Research

FROM: Eric M. Focht, Materials Engineer */RA/*  
Component Integrity Branch  
Division of Engineering  
Office of Nuclear Regulatory Research

SUBJECT: SUMMARY OF PUBLIC MEETING BETWEEN THE NUCLEAR  
REGULATORY COMMISSION STAFF AND REPRESENTATIVES  
OF THE NUCLEAR POWER INDUSTRY REGARDING RESEARCH  
SUPPORTING THE GOAL OF RISK-INFORMING 10 CFR 50  
APPENDIX G

On August 21, 2008, the Nuclear Regulatory Commission (NRC) staff met with representatives of the Electric Power Research Institute, Westinghouse Electric Company, AREVA, FirstEnergy Nuclear Operating Company, other industry and utility representatives in a public meeting in Rockville, Maryland. The purpose of the meeting was to present and discuss research performed with the aim of developing a risk-informed basis for a revision of 10 CFR 50 Appendix G. The NRC staff, contractors, and the industry representatives reviewed recently performed work and indicated that they were aiming to present a document. This document would detail their proposed technical basis for the adoption of risk-informed margins in Appendix G of ASME Section XI, to which Appendix G of 10 CFR 50 references, at the November 2008 ASME Boiler and Pressure Vessel Code meeting. Staff and industry representatives agreed to meet again in a public forum in October of 2008 to exchange information prior to the Code meeting.
