Robert Tedesco, Assistant Director for Containment Safety, L

TECHNICAL REVIEW OF HYDROGEN CONTROL SYSTEMS

In response to R. W. Sliger's memorandum of April 19, 1972, the technical information necessary for the safety review of the hydrogen control systems for the plants listed below has been provided to the Containment Systems Branch (CSB):

- | | |
|--------------------|---------------------|
| Aguirre-1 | Prairie Island 1-2 |
| Arkansas-1 | Rancho Seco |
| Calvert Cliffs 1-2 | Salom 1-2 |
| Cook 1-2 | Shearon Harris |
| Crystal River | Summer-1 |
| Forked River | Three Mile Island-1 |
| Indian Point-3 | Waterford-3 |
| North Anna 3-4 | Watts Bar 1-2 |
| Oconee 2-3 | |

The CSB reviews should be performed on the schedules approved by Management for the respective plants as shown in the Regulatory Licensing Applications, Progress Summary Report (planned to be issued during the week of 5-22-72).
