Kevin Royston, P.E.
Radiation Safety Officer
Rowe Incorporated
C/O Genesee Business Center
4400 South Saginaw Street, Suite 1200
Flint, MI 48507

Dear Mr. Royston:

Enclosed is Amendment No. 10, to your NRC Material License No. 21-24710-01 in accordance with your request by letters dated June 25, 2008 and August 21, 2008. Please note that the changes made to your license are printed in **bold** font.

This amendment deletes former License Condition 20 which addressed possession limits, but is no longer needed since possession limits were recently added to License Items 8.A. and 8.B. Also, please note the minor modifications that have been made to the leak test condition, in License Condition 13. D.

Please note that License Condition 15, which addresses security criteria for portable nuclear gauges, has been modified in its entirety to incorporate additional security measures. These security measures are based on revisions to 10 CFR Part 30, by the addition of paragraph 30.34(I), "Security requirements for portable gauges," as published in the Federal Register on January 12, 2005, with an effective date of July 11, 2005. The final rule requires a portable gauge licensee to use a minimum to two independent physical controls that form tangible barriers to secure portable gauges from unauthorized removal whenever the portable gauges are not under the control and constant surveillance of the licensee. Existing licensees should have previously received a copy of this regulatory requirement by mail. This mailing included a revised copy of Appendix H, "Operating, Emergency, and Security Procedures," of NUREG - 1556 Volume 1, Revision 1, Consolidated Guidance About Materials Licenses; Program-Specific Guidance About Portable Gauge Licenses, dated November 2001, which incorporates these changes.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room

K. Royston

or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

Loren J. Hueter
Materials Licensing Branch
