Dear Dr. Ganatra:

Thank you for bringing to our attention errors found in your license. A location of use was not added to license condition 10 and a referenced letter was omitted from license condition 15. In our review of this license we also noted that the amendment number should have been 53 and that the atomic number for gadolinium was incorrect. These errors have been corrected in the enclosed corrected copy of your license. We apologize for any inconvenience this error may have caused you.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

A handwritten signature in cursive script, appearing to read "Toye L. Simmons".
