Subject: RE: RAI 9.4-4 proposed language

All,

I think the proposed RAI 9.4-4 is very succinct but includes all the technical components of the previous RAIs (e.g., 9.4-1, 9.4-2, and old 9.4-4) plus Jim's suggestion especially on the analysis of environmental impacts and economic costs, thus I'm supporting it.

Subject: RE: RAI 9.4-4 proposed language

FYI - We are having internal discussions regarding this one - hope to get it resolved soon after Rajiv is available at 2:00.

Subject: RAI 9.4-4 proposed language

Paul/Bruce:

Here is language appropriate to use in the RAI based on the ESRP:

"Describe the environmental impacts and economic costs for the structural designs considered for the circulating water intake structure. Describe how you reach your conclusion that none of the other design options were environmentally preferable. Describe the environmental impacts and economic costs for the structural designs considered for the circulating water return structure. Describe how you reach your conclusion that none of the other design options were environmentally preferable."

-Jim
