Subject: Correction Pages for NEDC-32851P-A, Revision 4, “GEXL14 Correlation for GE14 Fuel”

There have been some errors identified in the acceptance version of the GNF Topical Report (TR), GEXL14 Correlation for GE14 Fuel, NEDC-32851P-A, Revision 4 (Reference 1). Because some of these errors affect relevant numerical values, the correction pages are being transmitted for your review and approval. The errors do not affect the correlation or the final correlation statistics. The changes are summarized in the revision status table and are identified by a revision bar in the right hand margin. As noted in the status table some editorial corrections have also been made.

Please note that Enclosure 1 contains proprietary information of the type that GNF maintains in confidence and withholds from public disclosure. The information has been handled and classified as proprietary to GNF-A as indicated in its affidavit, also included in the report. The affidavit contained in Enclosure 3 identifies that the information contained in Enclosure 1 has been handled and classified as proprietary to GNF-A. GNF-A hereby requests that the information in Enclosure 1 be withheld from public disclosure in accordance with the provisions of 10CFR2.390 and 9.17.

Enclosure 1 is the proprietary version of the change pages for the GEXL14 Correlation TR and Enclosure 2 is a non-proprietary version. Enclosure 3 contains the affidavit.

If you have any questions about the information provided here, please contact me at (910) 675-5954 or Jim Harrison at (910) 675-6604.

Sincerely,

Andrew A. Lingenfelter
Vice President, Fuel Engineering
Global Nuclear Fuel–Americas, LLC
