Q-2

RECEIVED  
REGION 1  
2008 SEP - 8 PM 12: 57

Mr. Sattar Lohdi, Ph.D.  
U.S. NRC Region I  
475 Allendale Road  
King of Prussia, PA 19406

RE: Amendment to License  
NRC License No. 37-30704-01  
Docket No. 030-35895

Dear Mr. Lodhi:

This letter concerns several requests in regards to changes with our NRC license.

We would like to change our storage address from our former Mount Laurel, NJ office location, which will no longer exist, to our current Voorhees, NJ office location. The revised address and contact is as follows:

<p><u>Former</u> 127-A Gaither Drive Mount Laurel, NJ 08054 (856) 231-0800 (856) 231-9949 Fax</p>	Change To:	<p><u>Current</u> 1101 Laurel Oak Road Voorhees, NJ 08043-7346 (856) 783-1900 (856) 783-2100 Fax</p>
---	------------	--

The material(s) stored will be limited to those specified under our existing license and will consist of nuclear, moisture-density gauges (gauges). The gauges will be stored within a locked storage cabinet in a locked shed built on conventional spread foundations, in the parking lot of our new office location. A sketch of the facility, showing the location of the locking storage cabinet is attached for review.

There have been no leaking gauges stored at the Mount Laurel, NJ office location.

CMX would like the change the Radiation Safety Officer (RSO) on our license from Michael Wright to Eric DeRicco.

In regards to a conversation I had with Sattar Lohdi on September 3<sup>rd</sup>, 2008, the following is an inventory listing of our twenty-seven (27) gauges that CMX currently owns. We are looking to make sure that the total number of millicuries allowed per our above referenced license is not exceeded, and if it is, have it revised so that we are in compliance with NRC regulations. Our current license allows us to have a total of 1188 millicuries of Am 241:Be, and 269 millicuries of Cs-137.

Gauge Type	Total Number of Gauges
CPN	4
Humboldt	7
Troxler	12
Instro Tek	4
