Subject: Implementation of Methods Limitations - NEDC-33173P (TAC No. MD0277)

By Reference 1, the NRC issued its Safety Evaluation (SE) regarding the GE Hitachi Nuclear Energy (GEH) Licensing Topical Report (LTR) NEDC-33173P. During subsequent phone calls with the NRC, GEH discussed its planned implementation of certain Limitations documented in Section 9 of the SE. GEH understood from these discussions that the NRC agrees with GEH's proposed implementation. The enclosed documents the agreed implementation of certain limitations as discussed during those phone calls.

If you have any questions, please contact Mike Lalor at (408) 925-2443 or me.

Sincerely,

James F. Harrison
Vice President, Fuels Licensing
Regulatory Affairs
GE Hitachi Nuclear Energy
