Subject: AMENDMENT REQUEST

Dear Sirs:

The Eastern Virginia Medical School is requesting an amendment to its materials license. The proposed amendment includes the following:

Removal of two sealed sources:

#	Nuclide	Source No.	Activity
1	Sr-90	EE-256	25 uCi
2	Sr-90	C4-422	100 uCi

The above sources are no longer needed and have been returned to their owner.

Addition of one sealed source:

#	Nuclide	Source No.	Original Activity	Current Activity
1	Sr-90	SIA.6 #1757	10 mCi	5 mCi

The above source is a concave ophthalmic applicator manufactured by Amersham; its data sheet has not been located, but it is estimated that it was produced in the mid 1970's. The medical school will not own the source or use it on humans, but we desire to use it at our facility. We will ensure the proper storage and use as well as compliance with our radiation safety program. When the use of the source is no longer desired, the school will request an amendment to its license to remove the source.

If you have any questions or concerns regarding this request, please contact Courtney Kerr, Radiation Safety Officer and Director of Environmental Health and Safety at (757) 446-5103 or send email to kerrca@evms.edu.

Sincerely,

Courtney Kerr, CEM, CHMM
