Subject: Missing Film Badges

We recently received a notification from our film badge supplier, Global Dosimetry Solutions, that the film badges that were to be worn 5/15/08 to 6/14/08 had not been returned. The notice included both of the Harrison Steel locations that use film badges – the Radiographic Department and the medical X-ray area.

Since the film badges for the two areas are shipped in separate envelopes to different Harrison Steel personnel, it is our conclusion the badges were never received. The monitored personnel continued wearing the badges issued 04/15/08 until the 06/15/08 badges arrived. No exposures were reported for any of the badges worn for two months instead of one month. The pocket dosimeter totals for the period were also negligible, so it was concluded personnel exposures were negligible.

I reported this information to Global Dosimetry Solutions and requested they show the badges issued 04/15/08 were worn for two months.

Please contact me at 765-762-9036 if you need more information.

Sincerely yours,

William D Hollander
RSO
