Subject: USNRC Docket No. 71-9336, HI-STAR 60, TAC NO. L24121

Reference: [1] Holtec Project 1630
[2] NRC letter dated September 3, 2008
[3] License Application for HI-STAR 60, Holtec Letter 1630015, dated August 30, 2007

Via letter (Reference 2), the SFST provided a Request for Additional Information (RAI) on our proposed license application (Reference 3) for the HI-STAR 60 Certificate of Compliance. The letter requested a response to the RAI by October 3, 2008, and further requested that if Holtec is unable to meet this deadline to notify the NRC in writing of a new submittal date by September 17, 2008.

We appreciate the SFST providing us with a date which reflects our urgency on this project. However, at this time Holtec plans to submit the responses to the RAI before the end October 2008. This schedule reflects the time to perform the analysis essential to support our responses. This also assumes any information exchanged during the public meeting to be held on September 24th will not effect our RAI submittal date.

If you have any questions or require additional information, please contact us.

Sincerely,

Tammy S. Morin
Acting Licensing Manager, Holtec International
