

VOLUME 2 OF 3 (Appendices A thru D)

PERFORMANCE ASSESSMENT for the F-TANK FARM at the SAVANNAH RIVER SITE

June 27, 2008

Prepared by: WSRC Site Regulatory
Integration & Planning
Aiken, SC 29808

Prepared for U.S. Department of Energy Under Contract No. DE-AC09-96S

Appendix A.1
WASTE FLUX LEAVING TANK LINER AND ANCILLARY EQUIPMENT

Appendix A.1 contains curves showing the waste flux (in Ci/year or Kg/year) leaving the associated liner for the individual tanks and ancillary equipment for 20,000 years. The flux is provided for all radionuclides and chemicals.

Graph heading example "CaseA_Tank01_Ag"

Key

CaseA = scenario case
Tank01 = Inventory source is Tank 01
Ag = radionuclide or chemical of concern
